TL;DR

I am an auteur/experimental artist who uses both visual (film and visual) and writing (poetry and stories) to express myself. Professionally I have experience working as a Creative Head/Director and other many different roles. Writing is where I started and it is one of my main skills.

So if you, your team or brand could use my skills, I would love to get into a conversation and know more. Concepts, Ideas, Strategy, Style etc. are my forte.
