SUMMARY

Full Stack PHP/Laravel Developer with 4+ years of experience building ERP, SaaS, and legal-tech systems across 5+ live products. Specialized in REST and RESTful API development, payment gateway integration (Stripe, SolidGate), relational database design, and Laravel version migrations (v8–v12). Proven ability to independently own full-stack delivery from schema design to production deployment.

SKILLS

Backend: PHP 8.x, Laravel 10/11/12, RESTful APIs, MySQL, Relational Database Design, Query Optimization, Database Performance Tuning, JWT, OAuth 2.0, PDO

Frontend: Vue.js 3, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Blade Templating, Axios

Cloud & DevOps: AWS S3, Docker, Git, GitHub, Linux, Postman, GitHub Copilot

Integrations & Practices: Stripe, SolidGate, OpenAI API, RBAC, Agile, Webhook Validation, Service-Oriented Architecture, API Versioning

EXPERIENCE

Full Stack Developer

Jul 2024 – Present

ATEAM Soft Solutions, Trivandrum

- Architected backend for 3+ ERP and SaaS products using Laravel 12 with financial workflows and full transactional integrity.
- Designed and maintained 20+ RESTful API endpoints with JWT authentication and role-based access control.
- Integrated Stripe and SolidGate with webhook validation and idempotency handling – zero payment data loss in production.
- Improved MySQL query performance by ~40% through strategic indexing and database performance tuning on high-traffic endpoints.
- Refactored 4+ legacy modules into service-oriented architecture in an Agile environment, cutting code duplication by ~30%.

Key Projects:

- **Celesora** – Advisor-member SaaS with multi-tenant onboarding, AWS S3 storage, SolidGate payments, and RBAC-secured APIs; built Vue.js 3 frontend dashboards integrated with Laravel REST APIs via Axios. (*Laravel 12, Vue.js 3, MySQL, AWS S3, JWT*)
- **EasyAdvo** – Legal-tech case management with client RBAC, document handling, Stripe billing. (*Laravel 12, Vue.js, MySQL, Stripe*)

Freelance Full Stack PHP/Laravel Developer

Sep 2023 – Jun 2024

Independent, Remote

- **Duboxx** – Built e-commerce platform for package/product listings with RESTful API backend and Vue.js frontend, delivered in 3 months. (*Laravel, Vue.js, MySQL, AWS S3*)
- Migrated 2 client codebases from Laravel v8/v9 to v10/v11 with zero downtime, resolving all deprecations.
- Independently delivered API development, relational database design, and deployment for 3+ clients.

PHP Developer

Oct 2021 – Aug 2023

Glinjos Innovations, Kannur

- **GDiary** – GST billing and financial accounting system with compliant invoicing, transaction ledger, reporting. (*Laravel, MySQL, Blade*)
- Developed HRM modules with payroll computation (100+ employees), leave management, and multi-format reporting.
- Designed normalized relational database schemas with indexing and foreign key constraints ensuring zero data anomalies.

EDUCATION

Bachelor of Computer Application, Kannur University

2018 – 2021
