

ADARSH A

Kanjirappally, Kerala, India

adarsh918g@gmail.com — +91 85907 71875 — linkedin.com/in/adarshhh — github.com/adarsh7

Professional Summary

Integrated MCA graduate with hands-on experience in full-stack web development using the **MERN stack**. Strong programming foundation in **Java, JavaScript, PHP, SQL, C, and C++**. Experienced in building RESTful APIs, database-driven applications, and role-based systems. Quick learner with strong problem-solving skills and interest in backend and scalable system development.

Technical Skills

Programming Languages: Java, JavaScript (ES6+), PHP, Python, C, C++

Web & Backend Technologies: React.js, Node.js, Express.js, REST APIs, HTML5, CSS3

Databases: MongoDB, MySQL, SQL

Frameworks & Tools: MERN Stack, Django (Basic), Git, GitHub

Concepts: Object-Oriented Programming, Data Structures Basics, MVC Architecture, CRUD Operations

Soft Skills: Problem Solving, Logical Thinking, Communication, Team Collaboration, Time Management

Projects

DEBATO – AI-Driven Communication Platform

MERN Stack, Python

- Developed a full-stack MERN application with secure authentication and role-based access control.
- Built RESTful APIs using Node.js and Express.js for scalable backend services.
- Designed and optimized MongoDB schemas for performance and data integrity.
- Integrated NLP-based features for grammar correction and language feedback.

Geopolitics 101 – Current Affairs Platform

JavaScript, HTML, CSS

- Created a responsive frontend application using vanilla JavaScript and modern CSS.
- Implemented modular JavaScript logic to present complex geopolitical content clearly.
- Improved content readability and user engagement through structured UI design.

Car Service & Sales Management System

PHP, MySQL

- Developed a role-based web application to manage vehicle services, customers, and sales records.
- Implemented CRUD operations using PHP and MySQL with optimized SQL queries.
- Applied server-side validation, authentication, and relational database design.

Experience

Python Django Developer Intern

Jun 2024 – Jul 2024

Zoople Technologies, Ernakulam

- Assisted in backend development and maintenance of Django-based web applications.
- Improved database queries and backend logic to enhance application performance.
- Collaborated with senior developers to debug issues and implement feature updates.

Education

Integrated Master of Computer Applications (MCA)

2026

Amal Jyothi College of Engineering (Autonomous, NAAC A+)

CGPA: 7.89

Class XII (Commerce)

St. Thomas HSS, Erumely

GPA: 9.7 / 10

Class X

Mary Matha Public School, Edakunnam

GPA: 7.8 / 10

Certifications

- OCI AI Foundations Associate
- OCI Generative AI Professional
- Cisco IoT & Digital Transformation
- Google Digital Marketing

Additional Information

- Actively practices debate and public speaking to improve articulation and confidence.
- Strong interest in backend development, system design, and scalable applications.
- Regularly builds projects and experiments with new technologies on GitHub.
