PROFESSIONAL SUMMARY

Backend-focused Software Engineer experienced in building scalable web applications and high-performance APIs using PHP, Laravel, and MySQL. Strong in database optimization, third-party API integrations, and improving system performance in production environments serving thousands of users. Comfortable owning features end-to-end while collaborating within structured teams.

TECHNICAL SKILLS

Backend: Core PHP, Laravel, CodeIgniter, MVC Architecture, REST API Development, API Integration, Secure Authentication, RBAC, Performance Optimization, Scalable Systems
Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, Tailwind CSS
Database: MySQL (Query Optimization, Database Design, Database Optimization)
API Integrations: Razorpay, Google Maps API, Places API, WhatsApp API, SMS DLT, TPStream, Zoom API, Vimeo
Concepts: API Design, Secure Coding Practices, System Scalability
Tools: Git, GitHub, Postman, Cloudflare, Cloudways

EXPERIENCE

PHP Developer 2024 – Present

XpertConsortium Technologies LLP

- Developed and maintained scalable PHP applications serving 5K+ monthly active users using MVC architecture
- Built and maintained production systems serving 5K+ users with high availability and optimized performance under real-world load
- Designed and optimized RESTful APIs, reducing average response time by 25%
- Reduced application load time by 30% through MySQL query optimization and backend refactoring
- Integrated Razorpay, Google Maps, WhatsApp API, and SMS DLT enabling real-time payment and communication workflows
- Implemented secure authentication and RBAC, improving access control and system security
- Owned end-to-end feature development from requirement analysis to production deployment
- Diagnosed and resolved critical production issues, reducing downtime and improving system stability

PROJECTS

Squarefit – E-commerce & Appointment System | PHP, MySQL

- Built an e-commerce and appointment system supporting 5K+ users and 300+ monthly transactions
- Integrated Razorpay, Google Maps, WhatsApp API, and SMS DLT for automated booking and payment workflows
- Optimized backend workflows reducing order processing latency by 20%

Thinc Design – Learning Platform | Core PHP, REST APIs

- Developed backend APIs supporting 1K+ concurrent users in a live learning platform
- Integrated TPStream and Zoom APIs enabling real-time video delivery and session management
- Optimized API queries and backend logic, reducing server load during peak traffic

Elace Learning Platform | PHP, API Integration

- Migrated video infrastructure from Vimeo to TPStream with zero downtime for active users
- Improved streaming reliability and reduced buffering through backend restructuring

NIT Calicut – Website Migration | Deployment

- Executed production server migration with 1 hour downtime ensuring uninterrupted service
- Improved deployment reliability and reduced post-deployment issues

EDUCATION

Govt Engineering College Wayanad

Bachelor of Technology (B.Tech) in Computer Science and Engineering

2020 – 2024
