PROFESSIONAL SUMMARY

Senior Backend Engineer with **9+ years of experience** designing and building **scalable, secure, and high-performance backend systems** using Laravel, PHP, and modern API architectures.

Expert in **enterprise SaaS platforms, ERP integrations, high-volume transactional systems, and IoT-driven applications**. Proven ability to design **multi-application architectures, optimize database performance, and implement secure payment and authentication systems**.

Strong experience leading backend development, mentoring teams, and delivering **production-ready distributed systems** for B2B, SaaS, and high-availability environments.

CORE TECHNICAL SKILLS

- **Languages :** PHP, JavaScript
- **Frameworks :** Laravel, CodeIgniter
- **Backend Architecture:** REST API Design, Microservice-ready Architecture, Multi-tenant Systems
- **Databases:** MySQL, PostgreSQL, MSSQL (Query Optimization, Indexing, Performance Tuning)
- **Caching & Performance:** Redis (Conceptual), Queue Systems, API Optimization
- **Security:** API Security, Authentication Systems, Role-based Access Control
- **Integrations:** Payment Gateway, ERP Systems, IoT Device APIs
- **Tools:** Git, WebSockets, Firebase, MQTT (Basic)
- **Concepts:** Scalable Architecture, High Availability Systems, Clean Code Practices

PROFESSIONAL EXPERIENCE

- **Cords Innovations - Senior Web Developer** (November 2020 – March 2026)
 - Lead development of custom web solutions for enterprise and B2B clients.
 - Designed and built secure backend systems using CodeIgniter and Laravel.
 - Developed REST APIs for mobile apps, IoT devices, and third-party systems.
 - Handled third-party integrations including payment gateways and ERP systems.
 - Built scalable multi-role, multi-application platforms
- **Gooseberry IT Solutions - Web Developer** (January 2019- August 2020)
 - Developed client and admin systems using CodeIgniter and MySQL.
 - Implemented payment gateway integrations and reporting dashboards.
 - Worked closely with clients on enhancements and production issues
- **lExperts - Web Developer** (November 2016- December 2018)
 - Developed backend modules with focus on performance and clean code.
 - Handled debugging, testing, deployment, and production support.

- **Minusbugs – PHP intern** (From March 2016 –October 2016).
 - Learned PHP and MySQL fundamentals.
 - Assisted in minor modules and bug fixing
-

KEY PROJECTS

- **Retailer Sales & Account Management (Laravel, MySQL)**
 - Designed backend architecture for multi-application financial management system.
 - Implemented automated fund settlement workflows improving transaction efficiency.
 - Built modules for stock, sales, receivables, and reporting
 - **ERP Integrated Vendor Management System (CodeIgniter, MSSQL, ERP Integration)**
 - Developed ERP-connected vendor portal enabling secure onboarding and workflows
 - Implemented real-time data synchronization between ERP and web platform
 - Designed scalable role-based access architecture.
 - **EldLink – Elder Care IoT Monitoring & Emergency Response System**
 - Built high-performance APIs for real-time device data ingestion.
 - Developed monitoring dashboard and emergency response workflows.
 - Implemented scalable backend architecture for critical alert systems.
 - **Gcart – E-commerce Web Application**
 - Developed backend APIs powering React frontend applications
 - Implemented order management, cart, payment, and admin workflows
 - Optimized system performance for high-traffic usage scenarios.
-

EDUCATION

- Bachelor of Computer Applications (BCA) – MG University (2012–2015)
- Higher Secondary – Computer Science (2010–2012)
