Professional Summary

Results-driven Senior Software Engineer with 6+ years of hands-on experience in web development using HTML, CSS, JavaScript, PHP, Laravel and WordPress. Skilled in developing responsive, performance-oriented web applications and custom solutions. Proven ability to manage full project lifecycles, troubleshoot complex issues, and deliver scalable systems across various industries.

Professional Experience

Poornam Info Vision Pvt. Ltd – Senior Software Engineer

Kochi, Kerala | Nov 2019 – July 2025

Projects

Project 1: Crowdfunding Website

WordPress, PHP, CSS, JS, MySQL, jQuery

Developed a crowdfunding platform for students. Enabled campaign creation, 20% self-funding, and patron dashboards with student progress tracking.

Project 2: Responsive Websites

Bootstrap, WordPress, PHP, CSS, JS, MySQL, jQuery

Built responsive websites from scratch. Customized WordPress themes, converted HTML templates, and created custom contact form plugins.

Project 3: Thycotic Access Controller

PHP, Laravel, jQuery, JS

Enhanced frontend features, fixed bugs, and handled database-related issues.

Project 4: Macarthur Castles Website

WordPress

Added features and modified the WP Booking System plugin as per client needs.

Project 5: WordPress Landing Pages

WordPress

Designed and built responsive landing pages based on mockups.

Project 6: WHMCS Customization

PHP, JavaScript, AJAX, MySQL, Smarty

Customized WHMCS for Bobcares. Improved product flow, payment integration, and addon features.

Project 7: Bobcares Website

WordPress, PHP, JavaScript, AJAX, HTML/CSS

Created dynamic pages, custom plugins, modules, and post types for enhanced functionality.

Project 8: Client portal for bobcares site

Laravel, PHP, JavaScript, AJAX, HTML/CSS

Client management portal with Client side and admin side logins. Admin can view the client informations and Client can view the operations.

Project 9: Client portal for Tsukaeru

Laravel, Next js

Client management portal for Tsukaeru site with admin side and partner side. Third-parties are integrated through api's for client operations. Admins have role wise permissions and partners have different users with different operations.
