SUMMARY

With over a decade in software development, I bring deep expertise in PHP backend frameworks, ReactJS front-end development, and emerging AI-driven technologies. I have a strong track record in leading impactful projects across e-learning, eCommerce, CRM, and school communication apps. My expertise now extends to OpenAI, Python FastAPI, vector databases like ChromaDB, embeddings, vector searches, large language models (LLMs), and natural language processing (NLP).

I am dedicated to delivering streamlined, innovative solutions while driving team mentorship, collaboration, and high-quality project execution. My technical and leadership abilities position me to advance cutting-edge digital products with AI-driven capabilities.

- **10+ years in backend development**, primarily focused on PHP with frameworks like Laravel, CakePHP, CodeIgniter, Wordpress & Core PHP.
- **AI technologies**, including OpenAI, Python FastAPI, vector databases (ChromaDB), embeddings, vector searches, LLMs, and NLP
- **Front-end expertise in ReactJS**, enabling the development of responsive, user-friendly applications.
- **Project leadership** with a history of driving successful digital platforms, including e-learning and school communication solutions.
- **Commitment to innovation** in simplifying processes and improving user experiences.
- **Strong mentorship and collaboration skills**, effectively guiding teams from project planning to execution.

EXPERIENCE

Team Lead

01/2021 - Present

2Base Technologies

Kochi, India

A technology firm specializing in custom software solutions.

- Advanced from Senior Software Engineer to Team Lead
- Conducting code reviews to ensure code quality
- Acting as the primary point of contact between the development team and stakeholders
- Led projects using Agile methodology
- Managed project coordination and client communication
- Oversaw release planning and execution
- Fostering a collaborative team environment
- Identifying potential risks and developing mitigation strategies
- Continuously evaluating and improving development processes

PROJECTS

SkoolBeep

01/2021 - Present

2BASE TECHNOLOGIES

SkoolBeep simplifies school communication and enhances learning outcomes. This user friendly app consolidates all parent communication features, including messaging, fee payments, report cards, attendance, timetable, calendar, bus tracking, and multimedia, in one place. It streamlines school data and processes efficiently. The Student Portal offers comprehensive insights into academic and non-academic activities.

- Database Design and Development
- Live vehicle tracking services using Sensei Services
- Integrated Email, SMS, and App Notification Services
- Azure Server file deployments, Server Images and Load balancers
- Payment Gateway Implementation

StudyBuddy

01/2021 - Present

2Base Technologies

An e-learning platform with video classes, subscription options, and online practice/exams. It provides various features like quizzes and assessments, allowing students to compete. Also providing the smart classroom solutions for schools.

- WhatsApp Business API Integration
- In-app Purchases - Google Play Store for digital contents
- Smart classrooms panels
- Team leading & Mentoring
- Code reviews & Version Controls
- Project planning & Client communications

BuddyLearn

01/2021 - Present

2Base Technologies

Streamline the StudyBuddy app's e-Learn Module web platform, facilitating effortless and convenient teacher-student online classes.

- BuddyLearn, web platform for StudyBuddy
- Leading team members for ensuring timely delivery
- Micromanagement of codes for a better performance
- Using performance testing tools

Kerala Kaumudi Applications

Kerala Kaumudi

I designed and developed a range of digital solutions for Kerala Kaumudi, enhancing their digital presence through E-Paper and News Apps built with Kotlin, and their associated websites. My work extended to creating Newstrack, a robust web software solution for news composing and printing, as well as software for scheduling and billing newspaper advertisements. Additionally, I developed BATS, the billing and time sales management system for Kaumudi TV Channel, along with circulation and CRM software for efficient newspaper distribution and customer relationship management. I also built the Kaumudy Matrimony website and managed various integrations to enhance user experience across platforms.

- **Mobile and Web Apps:** Developed E-Paper and News Apps for Kerala Kaumudi using Kotlin, including their respective websites.
- **News Software Development:** Created Newstrack, a comprehensive tool for news composing and printing, and software for ad scheduling and billing.

KEY ACHIEVEMENTS

★ Performer of the Month, 2Base Technologies

Recognized as the top performer for excelling in 2Base technologies, earning both monthly and quarterly awards.

PROJECTS

- **Billing and Sales Management:** Built BATS, Kaumudi TV Channel's system for billing and time sales, plus CRM and circulation software for newspaper distribution.
- **Matrimony Platform:** Developed the Kaumudy Matrimony website.
- **Integrations & Deployments:** Managed app uploads to Google Play Store, integrated Google Ads, Google Analytics, Taboola ads, YouTube and Facebook APIs, Razorpay payment gateway, Google Firebase for notifications, and social media logins across app and web platforms.
