

ARGHADEEP HALDER

Senior Software Engineer | Backend Developer

arghadeeph@gmail.com | +91 7384794163 | Kolkata, West Bengal - 743331

PROFESSIONAL SUMMARY

Results-driven Senior Backend Engineer with 10+ years of experience building scalable SaaS platforms, enterprise MIS systems, and high-performance REST APIs using PHP, Laravel, CodeIgniter, and MySQL. Proven impact in optimizing systems (60% faster DB response), automating workflows (50% effort reduction), and developing payment solutions handling 500+ monthly transactions. Full-stack capable (Vue.js, jQuery, AJAX, React-basics) with strong expertise in Git and Agile development. Currently expanding into Python & AI with hands-on experience in LLM integration, RAG pipelines, and prompt engineering to build intelligent applications.

CORE TECHNICAL SKILLS

Backend Development: PHP 7/8, Laravel (5.4-10.x) , CodeIgniter (2.x-4.5) , REST API, OAuth, JWT

Database Management: MySQL, Database Design, Query Optimization, Indexing, Database Migration, Redis

Frontend Technologies: JavaScript, jQuery, AJAX, Vue.js, Ionic, HTML5, Bootstrap, Responsive Design

Enterprise & SaaS: MIS, SaaS, CRM/ERP, Multi-tenant Architecture, RBAC, Admin Panels, Laravel Nova

Payment & Integration: Stripe, Recurring Payments, Payment Gateway Integration

Version Control & DevOps: Git (GitHub/GitLab), Version Control, Apache, Linux, Vercel

Emerging Technologies: Python, Django, Generative AI, OpenAI APIs, Large Language Models (LLMs), RAG (Retrieval-Augmented Generation), AI-powered Applications

Tools: Postman, Swagger, PHPUnit, JIRA, Composer, VS Code, PHPStorm

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Capitalnumbers Infotech Pvt. Ltd. | February 2021 - Present

- Architected RESTful APIs (Laravel) for enterprise training and service management system with JWT auth and RBAC middleware
- Optimized MySQL queries via indexing and query refactoring, reduced response time by 60%
- Developed MIS systems for party rental services, managing leads, bookings, inventory tracking, automated reporting, and email system.
- Implemented Git version control workflows and code review processes, improving team collaboration by 40%
- Delivered Laravel Nova admin panels with role-based access control and data validation

Senior PHP Developer

Farmneed Agribusiness Pvt. Ltd. | October 2020 - February 2021

- Developed REST APIs using Laravel 5.4 for mobile application backend connecting farmers with agricultural experts
- Managed Git repositories and implemented branching strategies for a team of 5 developers
- Built real-time notification system and chat functionality using AJAX and WebSocket integration

PHP Developer

Officious Infrastructure Pvt. Ltd. | April 2020 - September 2020

- Developed Laravel-based backend systems with MySQL database integration for a real estate application.

Software Engineer

ClickNotices Software LLP | November 2015 - March 2020

- Led development of MIS systems for loan management, real estate, and job portal platforms
- Integrated Stripe payment systems for SaaS applications handling 500+ transactions monthly
- Designed normalized MySQL database schemas supporting multi-tenant architecture
- Automated delinquency tracking, cutting manual intervention by 70%

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Brainware Group of Institutions, Maulana Abul Kalam Azad University of Technology | 2011-2015

KEY PROJECTS & ACHIEVEMENTS

Enterprise Training & Service Management System (2026-Present)

Tech Stack: Laravel API | Laravel Nova | Ionic Vue | REST API | MySQL | Git - Version Control

- Architected REST API backend serving cross-platform Ionic Vue mobile application, JWT auth with role-based middleware
- Developed Laravel Nova admin panel for managing training programs, referrals, and timesheets
- Managed codebase using Git version control with branching strategies and code review workflows

AI Transcription & Translation Platform (2026)

Tech Stack: Python (Django REST Framework) | React | OpenAI APIs | Git

- Developed REST APIs using Django and integrated with React frontend for file upload, processing, and structured transcription handling
- Integrated OpenAI Whisper for transcription and gpt-4.1-mini model for multilingual translation with timestamped outputs
- Deployed frontend on Vercel and backend on Render with Git-based auto-deployment pipeline

Live Demo: <https://transcribe-ai-nine.vercel.app>

Just4funpartyrentals.com - MIS Backend System (2022-2026)

Tech Stack: CodeIgniter 4.5 | REST API | jQuery | AJAX | MySQL

- Migrated legacy CodeIgniter 2.x to 4.5, improving performance and security
- Built RESTful APIs for WordPress frontend integration and third-party service connectivity
- Developed MIS system for inventory management, booking automation, and lead tracking

Uruploadz.com - Music Platform API (2021)

Tech Stack: Laravel 8 | REST API | Stripe | MySQL | Git | React.js Integration

- Designed and implemented RESTful APIs for React.js frontend with JWT authentication
- Integrated Stripe recurring payment system for SaaS subscription management

MIS for Cortex Construction Solution (2018-2020)

Tech Stack: Laravel 5.4 | jQuery | AJAX | MySQL

- Led full-stack development of comprehensive MIS system from ground up as Lead Developer
- Designed normalized MySQL database schema and implemented business logic algorithms
- Built modules for leave management, salary processing, job card tracking, and invoice generation

Noticeline - Loan Management System (2017-2019)

Tech Stack: Laravel 5.4 | jQuery | AJAX | MySQL

- Created loan and EMI calculation algorithms handling complex financial computations
- Built comprehensive system for loan requests, disbursements, EMI tracking, and lead management

ClickNotices - Rent & Delinquent Management System (2016-2018)

Tech Stack: CodeIgniter | jQuery | AJAX | MySQL | Git

- Developed and maintained backend for automated court filing and case management
- Automated delinquency tracking process reducing manual intervention by 70%

CERTIFICATIONS & TRAINING

- Ionic - Build iOS, Android, and Web Apps with Ionic & Angular - Udemy (2026)
- Multimedia (IT Smart) - Brainware - 70%
- Hardware (PC Magic) - Brainware - 76%
- NCC 'A' Examination Certificate - Grade B

PERSONAL DETAILS

Nationality: Indian

Languages Known: Bengali, Hindi, English

Interests: Travelling, Cooking, Photography

TECHNICAL COMPETENCIES

Backend Systems & Architecture: PHP (7/8), Laravel, CodeIgniter, RESTful API Design, Microservices, Service-Oriented Architecture, OAuth2, JWT, API Versioning & Documentation (Swagger/OpenAPI)

Data Engineering & Performance: MySQL, Database Architecture & Optimization, Indexing Strategy, Query Tuning, Stored Procedures, Data Modeling, Redis Caching, Transaction Management

Software Design & Engineering: Object-Oriented Programming, SOLID Principles, Design Patterns, Repository Pattern, Service Layer Architecture, MVC, Scalable System Design

Enterprise & SaaS Solutions: Multi-tenant Architecture, SaaS Platforms, MIS/CRM/ERP Systems, Admin Dashboards, Reporting Engines, Workflow Automation

Payment Systems: Stripe Integration, Payment Gateways, Subscription Management, Recurring Billing, PCI Compliance Considerations

Frontend & Integration Layer: Vue.js, JavaScript, jQuery, AJAX, REST Integration, Responsive UI Architecture, Headless CMS Integration

Security & Compliance: Authentication & Authorization, Role-Based Access Control (RBAC), Data Encryption, Secure Coding Practices, SQL Injection/XSS/CSRF Prevention

DevOps & Infrastructure: Git (GitHub/GitLab/Bitbucket), Linux Environments, Apache/Nginx, Docker (Containerization Basics), CI/CD Fundamentals

AI & Emerging Tech: Generative AI Integration, LLMs (OpenAI), RAG Pipeline Architecture, Prompt Engineering, AI Feature Implementation

Development Ecosystem: Composer, NPM, PHPStorm, VS Code, MySQL Workbench, JIRA, Confluence, Agile Methodologies
