

ARYA SIVAN

PHP DEVELOPER

+91 9526231639

aryasivanpct@gmail.com

Kochi, Kerala

SUMMARY

Experienced PHP developer with a solid 3-year track record in core PHP development. Proficient in designing and implementing server-side applications, with expertise in coding, debugging, and performance optimization. Skilled in database management and integration, ensuring seamless functionality across various web applications. Proven ability to collaborate in team environments, adhere to coding standards, and deliver high-quality, scalable solutions.

EDUCATION

Anna University

BACHELOR OF TECHNOLOGY
2015-2019

SKILLS

- PHP
- HTML
- CSS
- Boot Strap
- JavaScript
- RDBMS
- MySQL
- Laravel

CERTIFICATIONS

- The Ultimate MYSQL Bootcamp – Udemy
- PHP for Beginners become A PHP Master-CMS Project
- The Web Developer Bootcamp- Udemy

PROFESSIONAL EXPERIENCE

PHP DEVELOPER

Solution ERP | 2022 - Present

Extensive experience in designing, developing, and enhancing ERP modules for sales, purchase, manufacturing, general ledger (GL), human resource management (HRM), fixed assets, and inventory.

- Managed MySQL databases for ERP modules, including database design, optimization, and ensuring data integrity.
- Designed and managed intuitive dashboards providing stakeholders with real-time insights and facilitating informed decision-making.
- Developed efficient and scalable PHP code for various ERP modules, adhering to coding standards and best practices.
- Adept at overseeing the entire SDLC, from requirements gathering and technical specification to coding, testing, and ongoing maintenance.
- Designed, developed, tested, and maintained software applications to meet business requirements.
- Expertise in overseeing and optimizing the invoicing system for ERP modules, ensuring accuracy and efficiency in financial transactions.

PROJECTS

ERP (Enterprise Resource Planning)

Solution ERP

Technology Stack

Frontend : HTML, CSS, Bootstrap

Backend : Core PHP for server-side

Database : MySQL

West walk (Rental POS)

Solution ERP

Technology Stack

Frontend : Vue Js

Backend : Laravel

Database : MySQL

The Room Rental POS System is a comprehensive solution designed to streamline the process of renting rooms and generating invoices in PDF format. This system caters to businesses such as hotels, motels, guesthouses, and vacation rentals, providing them with a user-friendly interface to manage bookings and transactions efficiently. After completing a transaction, the system generates detailed invoices in PDF format. These invoices include relevant information such as customer details, booking dates, room rates, additional charges, taxes, and total amount due. The system allows users to manage room bookings seamlessly. It provides an intuitive calendar view to check room availability, make reservations, modify bookings, and cancel reservations as needed.
