Kottayam, Kerala, India

Summary

Backend-focused Software Developer with 3+ years of experience in PHP-based frameworks, primarily Laravel and Magento. Strong experience in building RESTful APIs, database-driven applications, and scalable backend systems. Capable of handling frontend tasks when required, including UI integration and AJAX-based interactions. Quick learner with the ability to adapt to new backend frameworks and technologies based on project needs.

Technical Skills

- **Backend & Frameworks:** PHP, Laravel, Magento 2
- **APIs & Architecture:** APIs & Architecture, Authentication & Authorization, MVC Architecture
- **Databases:** MySQL, SQLite, Query writing & optimization
- **Frontend (Supporting):** HTML, CSS, JavaScript, AJAX, UI integration with backend APIs
- **Tools & Environment:** Git, GitHub, VS Code, Postman, Linux (Ubuntu), Windows

LANGUAGES

- **English, Malayalam**

Education

■ Master of Computer Applications (MCA)

IGNOU University

2023 – Present

■ Bachelor of Computer Applications (BCA)

MG University

2019 – 2022

Experience

■ Associate Software Developer I Yatnam Technologies

August 2022 - Present

- Worked as a Lead Developer for multiple Magento and Laravel projects, guiding the team through development and delivery.
- Led a small team of developers by assigning tasks, reviewing code, and ensuring coding standards and best practices.
- Designed, developed, and maintained Magento 2 eCommerce applications with backend-heavy customizations.
- Customized Magento themes and modules to improve performance, scalability, and user experience.
- Built Laravel-based internal business applications, including an Employee Management System.
- Designed and integrated RESTful APIs for internal and third-party systems.
- Worked extensively with MySQL and SQLite, including complex queries and performance optimization.
- Implemented AJAX-based features for asynchronous data loading and improved UI responsiveness.
- Coordinated with project managers and QA teams to ensure timely delivery and smooth releases.
- Adapted quickly to new backend modules and evolving project requirements in an Agile environment.

KEY PROJECTS

■ Magento eCommerce Platforms

- Product catalog management
- Checkout and payment integration
- Order processing workflows
- Third-party API integrations
- Backend performance optimization

■ Internal Business Applications (Laravel)

- Employee Management System,
- Authentication and role-based access control
- RESTful APIs for internal tools
