SUMMARY

PHP developer building database-driven web applications using PHP and MySQL. Strong problem-solving skills through competitive programming, with interest in AI and Machine Learning.

PROJECTS

Content Management System — [GitHub](#)

- Developed a dynamic PHP-based blog platform with user authentication, session management, and full CRUD operations for blog posts.
- Integrated MySQL database for secure storage of user and post data using PHP, HTML, CSS, Bootstrap and XAMPP.

To-do API — [GitHub](#)

- Developed a secure full-stack To-Do application using Fast API with complete user authentication, CRUD operations, and RESTful APIs using SQL Alchemy ORM.
- Integrated responsive frontend (HTML, CSS, JavaScript, Jinja) with SQLite database and SMTP email notifications for production-ready functionality.

Job Automation — [GitHub](#)

- Engineered an automated Python web scraping system using Selenium and BeautifulSoup to collect, process, and store structured data from multiple websites.
 - Integrated Google Sheets API for automated data storage and reporting, significantly reducing manual data collection time.
-

TECHNICAL SKILLS

- **Languages:** PHP, Python, JavaScript, C++
 - **Frontend:** HTML5, CSS3, Bootstrap
 - **Backend:** Django, Flask, RESTful APIs
 - **Databases:** PostgreSQL
 - **Tools:** Git, GitHub, Vim, Postman
-

ACHIEVEMENTS

[Codeforces](#) Specialist with over 2 years of competitive programming experience

Solved 1400+ algorithmic problems across Codeforces and [LeetCode](#)

Achieved a 1569+ rating on LeetCode | Earned a 3-star rating on [CodeChef](#)

EDUCATION

Bachelor of Computer Application (BCA)
YCMOU, Mumbai — CGPA: 7.36

JUNE 2025

Higher Secondary | HSC — 74%

JUNE 2021
