Integrations & APIs: — RESTful APIs, Third-party API Integrations, Secure Payment Gateway Integration.

Tools & Platforms: — Git, GitHub, cPanel, Hostinger, DNS Management, SSL Configuration.

Development Practices: — Code Optimization, Debugging, Secure Coding, Performance Tuning, Version Control.

Team & Project Management: — Capable of leading and collaborating within cross-functional teams, task delegation, and project delivery under tight deadlines.

WORK EXPERIENCE

01/2026 – 03/2026
Gurgaon, India

Full-Stack Developer

Seoulux Technologies Pvt. Ltd.

- Develop and deliver high-quality, scalable websites and software solutions tailored to meet diverse business requirements.
- Design and manage robust MySQL databases, ensuring efficient data architecture, integrity, and optimal performance.
- Implement and integrate RESTful APIs and third-party services to provide seamless functionality and an enhanced user experience.
- Ensure responsive and interactive user interfaces using modern front-end technologies like HTML, CSS, and JavaScript.
- Follow best development practices, including Git version control, unit testing, and debugging, to deliver secure, reliable, and maintainable applications.

09/2024 – 10/2025
Varanasi, India

Full-Stack Developer

Wilcox Technologies Pvt Ltd

- Explored and implemented advanced solutions in web/mobile app development, AI, cybersecurity, gaming, enterprise software, and analytics to stay ahead of evolving tech trends.
- Design and manage MySQL databases and create schemas that support business processes.
- Proficient in domain and hosting management on Hostinger, including domain registration, DNS configuration, SSL integration, and website deployment.
- Be responsible for developing and testing performance critical components of the system and collaborate closely with team members designing software.
- Understanding of modern development workflows, version control (Git), RESTful APIs, and third-party integrations to support seamless application functionality.
- Familiarity with unit testing and debugging tools.

12/2021 – 08/2024
Patna, Bihar

Front End Developer

Care Web India Pvt. Ltd.

- Developed responsive front-end interfaces using HTML, CSS, JavaScript, Bootstrap, and integrated them seamlessly with Laravel-based backends.
- Collaborate with front-end developers to implement responsive and user-friendly interfaces using HTML, CSS, and JavaScript.
- Deployed and maintained web applications on live servers, ensuring smooth functionality, optimized performance, and minimal downtime.
- Worked on a diverse range of projects including websites, CRM systems, admin panels, email templates, landing pages, and custom software solutions.

PROJECTS

Mystery Rooms

- Mystery Rooms offers an immersive real-life escape room experience, where participants solve intricate puzzles and challenges within a set time limit to “escape” the room.
- Implemented a game booking system with online and offline modes, including Razorpay payment gateway for secure and convenient transactions.
- Developed a dynamic Mystery Rooms website using Laravel, integrating HTML, CSS, JavaScript, AJAX, and PHP for a seamless and responsive user experience.
- Designed a user-friendly interface to ensure easy navigation and enhanced engagement for all visitors.

Job Portal

- Designed and developed a Laravel-based job portal that allows students to apply for jobs, enables companies to post vacancies and hire candidates, and includes direct communication features such as call integration.
- Developed a feature-rich job portal using Laravel with HTML, CSS, JavaScript, AJAX, and PHP to ensure a responsive and user-friendly interface.
- Implemented core functionalities including job listings, candidate registration, employer dashboards, job applications, and search/filter features.
- Designed role-based access for admin, employers, and job seekers with real-time data management and automated email notifications.

E-Commerce Platform

- Developed a fully functional e-commerce website using Laravel, featuring product listings, shopping cart, secure checkout, user authentication, order management, and an intuitive admin panel for seamless online store operations.
- Developed a dynamic e-commerce website using Laravel, integrating HTML, CSS, JavaScript, AJAX, and PHP for seamless user experience and responsive design.
- Implemented key features like product catalog, shopping cart, wishlist, coupon system, and secure checkout with integrated payment gateway.
- Created separate user and admin panels for order tracking, inventory management, and real-time updates, enhancing overall site functionality and user engagement.

Hospital CRM

- A Hospital CRM manages patient relationships, appointments, records, billing, and communication, enhancing operational efficiency and patient care experience.
- Developed a comprehensive Hospital CRM system using .NET framework, integrating HTML, CSS, JavaScript, and SQL Server for a responsive and robust interface.
- Implemented modules for patient management, doctor scheduling, appointment tracking, billing, and real-time notifications to streamline hospital operations.
- Designed separate dashboards for admin, doctors, and staff to manage records, appointments, and internal communication efficiently.

School CRM

- A School CRM system optimizes student management, attendance tracking, academic performance, communication, and administrative workflows—enhancing operational efficiency, stakeholder engagement, and the overall educational experience for students and staff.
- Developed a School CRM system using Laravel, integrating HTML, CSS, JavaScript, AJAX, and PHP to deliver a dynamic and responsive user interface.
- Implemented modules for student management, attendance tracking, grades, communication, and administrative controls to streamline daily school operations.
- Created role-based dashboards for administrators, teachers, and students to ensure secure access and efficient data management.

HRM

- Developed an employee HRM system using Laravel that automates the creation of offer letters, appointment letters, PIP letters, and other official documents, streamlining HR processes and ensuring accuracy and efficiency.
- Developed an HRM system using Laravel with HTML, CSS, JavaScript, AJAX, and PHP to manage employee-related operations through an intuitive and responsive interface.
- Designed secure, role-based dashboards for HR managers and employees, enabling real-time updates and efficient data handling.

Billing & Inventory Software

- A powerful and user-friendly billing system crafted in Laravel, designed to simplify and automate complete business accounting—covering everything from party creation, stock, commission, sales, purchase, payments, returns, and invoicing to insightful reporting and secure data management.
- Developed a dynamic billing software using Laravel, integrating HTML, CSS, JavaScript, AJAX, and PHP for an interactive and user-friendly interface.
- Implemented modules for business setup, party management, sales, purchases, payments (in/out), commission tracking, and invoice generation with customizable templates.
- Designed features like stock management, return handling (sales/purchase), expense tracking, user role control, and data recovery via a recycle bin.

Informative Website

- Developed an informative website to share valuable content, updates, and resources with a responsive design and user-friendly interface.
- Designed a clean and user-friendly interface to present articles, updates, and resources effectively with interactive elements and smooth navigation.
- Developed an informative website using Laravel, incorporating HTML, CSS, JavaScript, AJAX, and PHP for a responsive and dynamic user experience.
- Implemented admin panel for content management, allowing easy updates, media uploads, and page control without direct code changes.
