

ABISHEK ARUNACHALAM

Backend PHP Engineer (Laravel) | REST API & E-Commerce Specialist

+91 77086 26309 | abiarun7708@gmail.com | Thiruthuraipoondi, Tamil Nadu, India | linkedin.com/in/abishek-arunachalam-4202ab213

PROFESSIONAL SUMMARY

Laravel Backend Engineer with 2.9 years of experience building scalable web applications, REST APIs, and e-commerce systems across fintech, food delivery, and merchant banking domains. Proven ability to design secure backend architectures, optimise MySQL performance, and integrate payment gateways in fast-paced product environments. Hands-on experience with AWS EC2 deployment, real-time systems (Pusher/WebSockets), and role-based access control. Passionate about writing clean, maintainable code and delivering production-ready features on schedule.

CORE SKILLS

Backend: Laravel, PHP, REST API Development, MVC Architecture, JWT Authentication, Queue Jobs, Cron Jobs, Microservices, Payment Gateway Integration

Database: MySQL, Eloquent ORM, Query Optimisation, Indexing, Database Architecture

Frontend: JavaScript, jQuery, AJAX, Bootstrap, Tailwind CSS, HTML5, CSS3

DevOps & Cloud: AWS EC2, Git, Linux, cPanel, Docker (basic), CI/CD basics, Jira, Confluence

Other: Pusher (WebSockets), Laravel Mailer, Role & Permission Systems, API Security, Third-party Integrations

WORK EXPERIENCE

Backend Engineer (Laravel) | Cloudrevel Innovation

Jan 2023 – Present | Tamil Nadu, India

Promoted from Junior Software Engineer within the first year based on performance and delivery quality.

- Designed and developed scalable REST APIs for production web applications serving 1,000+ active users across multiple domains.
- Built and maintained Zlatta, a full-featured decor e-commerce platform — covering product listings, order management, user roles, and content administration.
- Engineered Let's Dine, a food delivery and table-booking platform integrated with a mobile app; implemented role-based access control, user permissions, and real-time order tracking.
- Developed My Ledger, a Finance Management System integrated with HRMS — handling payroll automation, loan tracking, overtime calculations, and LOP processing.
- Worked on RUGR-Udaan, an API-driven merchant banking platform supporting digital payments, instant settlements, and merchant onboarding for rural and semi-urban markets.
- Contributed to a microservice-based Project Management platform, building modules for contribution tracking and third-party integrations.
- Deployed a real-time chat application using Laravel and Pusher with email notifications via Laravel Mailer; hosted on AWS EC2.
- Optimised MySQL queries and database schemas, improving API response time and overall system performance.
- Managed server configuration and deployments on Linux environments including AWS EC2.
- Collaborated with frontend, mobile, and product teams to deliver end-to-end features on schedule.

Laravel Developer (Intern) | iCoffee — Pencil and Monk

Jun 2022 – Jan 2023 | Tamil Nadu, India

- Gained end-to-end exposure to the full software development lifecycle — requirements gathering, design, coding, testing, and debugging.
- Built and maintained web features using Laravel MVC, AJAX, jQuery, and Tailwind CSS on live client projects.
- Developed reusable backend modules and API endpoints for web applications in a fast-paced startup environment.

- Participated in code reviews, debugging production issues, and improving application stability.
- Collaborated with senior engineers to deliver product features aligned with client requirements.

KEY PROJECTS

Let's Dine — *Laravel, MySQL, REST API, Role-Based Access Control, Mobile Integration*

- Full-featured food delivery and table-booking platform with an integrated mobile application.
- Built secure, scalable APIs for order processing, real-time updates, and user management.
- Implemented role-based permissions for admin, restaurant, and delivery personnel roles.

RUGR-Udaan — *Laravel, API Integration, Fintech, Payment Gateway*

- Merchant banking platform enabling digital payments and instant settlements for rural markets.
- Enhanced transaction security workflows and merchant onboarding processes in a cross-functional team.

My Ledger — *Laravel, HRMS Integration, REST API, MySQL*

- Corporate finance management system handling payroll automation, loans, LOP, and overtime.
- Designed optimised database schema and REST API architecture for complex financial calculations.

Real-Time Chat Application — *Laravel, Pusher, Laravel Mailer, AWS EC2*

- Real-time messaging app with WebSocket integration and email notification support.
- Deployed and configured on AWS EC2 — demonstrates cloud deployment and scalable architecture.

Multi-Vendor E-Commerce Platform (Zlatta) — *Laravel, MySQL, REST API*

- Developed backend APIs for product, order, and payment workflows.
- Implemented role-based permissions, secure authentication, and automated email notifications.

EDUCATION

B.E. Computer Science

2019 – 2023

ARMCET, Tamil Nadu, India | CGPA: 7.7 / 10

CERTIFICATIONS

- IBM — Web Phishing Detection Project Certificate
- iCoffee / PrepInsta — Software Development Examination Certification

LANGUAGES

English (Professional Proficiency) | Tamil (Native)

Open to full-time, contract, and remote opportunities across India and internationally
