

Aghil Davis

Software
Developer

PROFILE

As a software developer, I love writing neat and effective code to solve everyday problems with creativity. I'm well-versed in full-stack web development and skilled in languages like Python, JavaScript, and PHP. I enjoy working with others to build apps that are easy to use and grow smoothly.

WORK EXPERIENCE

Viewy Digital Pvt.Ltd. | Software Engineer

2024 Dec – Present

Software Engineer with strong expertise in PHP, specializing in Laravel-based backend systems and API development. Proven experience in designing scalable web applications, optimizing database performance, and implementing secure, high-quality code standards. Skilled in integrating third-party services, debugging complex issues, and enhancing system efficiency. Committed to continuous improvement, maintainable architecture, and delivering robust solutions aligned with business requirements.

Inworth It Solutions | PHP Developer

2024 Jun – 2024 Nov

PHP Developer specializing in Laravel for backend development and API integration. Experienced in creating and maintaining web applications, building secure APIs, and working with databases. Focused on writing clean, efficient code and solving technical challenges. Passionate about delivering reliable solutions and improving system performance.

Owiors For Social Media | Python Developer & ML

2023 Jan – 2024 May

Python Developer with experience in machine learning and neural network algorithms. Skilled in building models for data analysis, predictive analytics, and automation. Proficient in using libraries like TensorFlow, Keras, and Scikit-learn to develop and optimize machine learning solutions. Focused on applying deep learning techniques to solve complex problems and improve decision-making processes.
