

AKASH PANDEY

Full Stack Developer • 4+ Years Experience

☎8962163935 • akashpandey.ap1221@gmail.com • linkedin.com/in/akash-pandey-997a36207 • Bhopal, MP
(Open to Relocation & Remote)

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of hands-on experience building scalable web applications using Angular, PHP (CodeIgniter), and MySQL. Proven track record of deploying production systems on AWS (EC2, RDS, S3), integrating payment gateways (Razorpay), and delivering real-time platforms from scratch. Strong ownership mindset — managed complete client project lifecycles from requirements gathering through deployment. Seeking mid-senior roles in product-led companies where full-stack depth and cloud experience drive impact.

KEY HIGHLIGHTS

Angular + PHP Expert	AWS Deployments	Razorpay Integration	MySQL Optimization	Real-time Systems	REST API Design
-------------------------	--------------------	-------------------------	-----------------------	----------------------	--------------------

TECHNICAL SKILLS

Languages	PHP, JavaScript (ES6+), HTML5, CSS3
Frontend	Angular (v12+), Bootstrap, Responsive Design
Backend	PHP — CodeIgniter Framework, REST API Development
Database	MySQL — Query Optimization, Indexing, Schema Design
Cloud / DevOps	AWS EC2, AWS RDS, AWS S3, Application Deployment
Integrations	Razorpay Payment Gateway, OTP / SMS Authentication, Third-party APIs
Tools	Git, GitHub, Postman
Concepts	MVC Architecture, REST APIs, Authentication & Authorization, Agile

PROFESSIONAL EXPERIENCE

Full Stack Developer | DigisolutionX Pvt. Ltd.

Apr 2025 – May 2026 • Bhopal

- Owned end-to-end delivery of 5+ client projects, from requirement gathering and architecture design to AWS deployment and post-launch support
- Reduced MySQL query response time by ~35% through targeted indexing and query restructuring, improving page load speed on data-heavy modules
- Built RESTful APIs consumed by Angular frontends and third-party integrations, handling 10k+ daily requests
- Collaborated cross-functionally with designers, QA, and client stakeholders to deliver projects on schedule

Full Stack Developer | Formiverse Technologies Pvt. Ltd.

May 2023 – Apr 2025 • Bhopal

- Developed 3+ production-grade web applications using Angular (frontend) and PHP CodeIgniter (backend), serving 1,000+ active users

- Designed and implemented Razorpay payment gateway integration handling real transactions with webhook support and failure retry logic
- Built OTP-based authentication system using SMS APIs, reducing unauthorized access attempts
- Deployed all applications on AWS (EC2 for compute, RDS for managed MySQL, S3 for file storage), achieving 99%+ uptime
- Wrote REST APIs for cross-system communication, with documented endpoints used by mobile and third-party clients

Full Stack Developer | Briskon Technologies Pvt. Ltd.

May 2022 – May 2023 • Bhopal

- Built a real-time auction and bidding platform from scratch — live bid updates, countdown timers, and concurrent user handling using Angular and PHP
- Optimized backend queries for the bidding engine, reducing server response time under peak load by ~40%
- Developed reusable Angular components for the bidding UI, cutting frontend development time by ~20% for subsequent features

Junior Full Stack Developer | Infochord Technologies Pvt. Ltd.

Aug 2021 – Apr 2022 • Bhopal

- Developed e-commerce product listing, filtering, and search features for a Flipkart-like platform handling 5,000+ SKUs
- Integrated payment gateway for checkout flow, enabling end-to-end purchase transactions
- Contributed to frontend development with Angular, implementing responsive product pages and cart flows

KEY PROJECTS

Gofillform — Auto Form Filling Platform | Angular, PHP CodeIgniter, MySQL, AWS, Razorpay

- Built a platform that automates form filling with dynamic field mapping, saving users significant data entry time
- Integrated Razorpay for subscription payments with webhook-based payment confirmation
- Deployed on AWS EC2 with S3 for document storage and RDS for database

Real-Time Auction Platform | Angular, PHP, MySQL, WebSocket

- Architected a live bidding system supporting concurrent bids with real-time updates and automated lot closing
- Handled race conditions and concurrent write conflicts in the bidding engine via database-level locking

Flipkart Clone — E-Commerce Platform | Angular, PHP CodeIgniter, MySQL

- Built full e-commerce flow: product catalog (5,000+ SKUs), filtering, cart, GST billing, and payment checkout
- Implemented search with MySQL full-text indexing for fast product discovery

EDUCATION

B.Tech — Computer Science Engineering Sagar Institute of Research & Technology, Bhopal

2017 – 2021
