

AMEER SUHAIL

Senior Web Developer

PROFILE INFO

I'm Ameer Suhail, a PHP Developer skilled in PHP, JavaScript, and Python, with strong experience building web applications using frameworks like CodeIgniter and Laravel. I work on developing CRM, ERP, and LMS systems with role-based modules, reporting, and third-party integrations such as Meta Lead Ads for automated lead capture. My work includes creating custom tools like a Question Paper Generator, Poster Creator using fixed templates, and activity-based content systems using HTML uploads. I focus on clean architecture, efficient workflows, and scalable solutions, and I enjoy solving complex technical problems in fast-paced development environments.

EXPERIENCE

Senior Web Developer

Sep 2025 - Present

Skillpark, Malappuram

At Skillpark, I work as a Senior Web Developer handling PHP Laravel, JavaScript, and Python Django, where I develop and maintain CRM systems with role-based modules and reporting, integrate Meta Lead Ads for automated lead capture, and build custom tools such as a Question Paper Generator, Poster Creator, and HTML-based activity content system. I also contribute to ERP and HRMS modules including employee management, attendance, payroll workflows, and administrative reporting to support streamlined internal operations.

PHP Webdeveloper

May 2023 - Sep 2025

Trogon Media PVT LTD, UL Cyberpark, Calicut

During my time at Trogon Media, I honed my skills as a PHP Developer, working on a variety of projects that expanded my expertise in PHP and JavaScript. I collaborated with a talented team to develop web applications using frameworks like CodeIgniter, contributing to the success of several key projects. My experience at Trogon Media not only strengthened my technical abilities but also taught me the importance of teamwork and effective communication in achieving project goals.

PROJECTS

At Skillpark, I worked on CRM, ERP, LMS, and customized web applications. I developed Skillpark CRM with role-based modules for telecallers, academics, marketing, post-sales, and finance, including detailed reports and Meta Lead Ads integration for automatic lead capture. I built Eduthanzeel Activities Software for structured student activity delivery using HTML uploads, and developed the Eduthanzeel Question Paper Generator and Poster Creator using fixed templates for standardized output. Other key projects include the Future and Tree website, focused on performance and responsive UI.

At Trogon Media, I developed and maintained multiple LMS platforms with features such as course management, student tracking, and Zoom and Vimeo integrations. I also worked on several CRM systems to streamline lead handling and operations, ERP solutions for student and payment management, and additional projects including an employee tracking system, e-commerce platform, school event management system, a live gold rate-integrated application for Nexus Gold and Diamonds, and other customized business web applications.
