Lead a team of developers to design and deliver scalable CRM and Educational Management Systems, tailored to business and institutional needs. Oversaw full-stack development using Node.js, Laravel, CodeIgniter, MySQL, and React/HTML, delivering responsive user interfaces and robust, secure backends.

Successfully launched a custom CRM platform with advanced features like role-based access, real-time notifications, lead tracking, and analytics, significantly improving client workflows and decision-making. Designed and developed a full-featured e-learning and student management system, including attendance tracking, exam modules, course scheduling, and student portals, deployed across multiple institutions.

Defined project scope, managed sprints, conducted code reviews, and ensured on-time delivery. Boosted development efficiency by implementing reusable modules, enforcing version control practices, and improving overall architecture across projects. Mentored junior developers and fostered a high-performance, collaborative team culture.

In addition to web platforms, contributed to IoT solutions involving real-time device control and monitoring, integrating Node.js backends with MQTT, REST APIs, and MySQL for seamless hardware-software communication.

Maintained a strong focus on code quality, performance optimization, and adherence to industry best practices across all technologies and domains.
