SENIOR SOFTWARE ENGINEER

Experienced Laravel developer with 7+ years of expertise in building dynamic, high-performance web applications. Skilled in PHP, Laravel, MySQL, node.js, express, Postgresql and modern development practices such as RESTful API integration, unit testing, and version control with Git. Proven track record of delivering end-to-end solutions, optimizing application performance, and collaborating with cross-functional teams. Passionate about writing clean, maintainable code and keeping up-to-date with the latest technologies to drive innovative solutions.

SKILLS

PHP, Laravel, RESTful API integration, Unit testing, Git, Node.js, Express, MySQL, PostgreSQL, MongoDB, React.js, HTML, CSS, JavaScript, Jira, Trello, Docker, AWS, S3, EC2, GraphQL, Voyager, Wordpress, Magento, Elasticsearch, pest, Rector, Agile, vue js, Rabbit mq, PHPStan, Guzzle, Composer

WORK EXPERIENCE

IOCOD Infotech Pvt. Ltd • Kozhikode • 01/2025 - Present

Senior Software Engineer • Full-time

- Develop and maintain backend services using Laravel and modern PHP (8+) practices.
- Design and integrate RESTful APIs for internal and external system communication.
- Write unit and feature tests using PestPHP to maintain high code quality.
- Perform automated code refactoring and upgrades with Rector, ensuring long-term maintainability.
- Collaborate with cross-functional teams (UI/UX, DevOps, QA) to deliver high-quality products.
- Manage robust data models and queries using MySQL.
- Optimize database performance using indexing, query optimization, and caching strategies (Redis, Memcached).
- Participate in system design and architecture discussions, particularly around scalability, security, and maintainability.
- Collaborate with cross-functional teams using Agile/Scrum methodologies.

Metric Tree Labs • Palarivattom • 11/2023 - 12/2024

Senior Software Engineer • Full-time

- Developed and optimized web applications using Laravel, Express, React, and Livewire, enhancing user experience and performance.
- Designed and integrated APIs, including GraphQL, for seamless third-party system communication.

- Managed databases (PostgreSQL, MySQL, MongoDB) to ensure data integrity and efficient storage solutions.
- Implemented Google Cloud Services for scalable deployment and cost-efficient resource management.
- Handled team coordination and led project delivery, contributing to the company's profitability by streamlining workflows.
- Integrated payment gateways to expand application functionality and ensure secure transactions.

Tiatech Health Technologies Pvt Ltd • Thrissur • 01/2020 – 11/2023

Senior Software Engineer • Full-time

- Designed and developed robust web applications using Laravel and CodeIgniter, enhancing system efficiency and user experience.
- Managed and optimized PostgreSQL databases, ensuring data integrity and improving query performance.
- Collaborated with cross-functional teams to streamline development workflows and deliver high-quality projects on time.

Pinetech IT Solutions Pvt Ltd • Koratty • 03/2019 – 12/2019

PHP Developer

- Designed and developed robust web applications using Laravel, enhancing system efficiency and user experience.
- Managed and optimized PostgreSQL databases, ensuring data integrity and improving query performance.
- Developed and maintained unit tests using PHPUnit to ensure code reliability and reduce production defects.

PROJECTS

OPS • 02/2025 – Present

The OPS system handles operational workflows for orders created in OMS. It manages item scanning, box creation, and packing processes to prepare shipments for delivery. Developed robust backend services using Laravel, following modern PHP standards.

Implemented dynamic and user-friendly frontend components using Vue.js.

Utilized **PHPStan** for static code analysis, ensuring code quality and maintainability.

Wrote and maintained unit and feature tests with **Pest** to ensure application stability.

Applied **Rector** for automated code refactoring and Laravel upgrades.

Integrated **Elasticsearch** for high-performance search and filtering across large datasets.

Designed scalable database schema in MySQL, optimizing queries for performance.

OMS • 01/2025 – Present

Developed and maintained an Order Management System to streamline the creation, tracking, and management of customer orders.

Designed and implemented RESTful APIs using Laravel for handling order workflows.

Built interactive and responsive user interfaces with Vue.js for order creation and status tracking.

Managed complex relational data and optimized queries in MySQL for performance.

Integrated validation, role-based access, and notification features to enhance system reliability.

Hotel booking • 10/2024 - 12/2024

Developed an booking application using React Native for the frontend, with a Node.js backend and PostgreSQL as the database. mobile application using Node.js, and Prisma Integration Stripe for the Payment Intent integration , Google Map APIs for location details and nearby search, Firebase for notification, SendGrid for Email,Twilio for SMS

Tajmeel (online appointment booking) • 07/2024 - 09/2024

Developed an appointment booking platform for skin care services, allowing suppliers to list their services and users to book appointments.

Used Laravel and Livewire to build both the front-end and back-end, delivering a dynamic and responsive user interface.

Implemented GraphQL to streamline data querying and improve app performance.

Integrated payment gateway (Stripe) for secure transaction processing and ensured a smooth user experience for both service providers and customers.

Service booking management App (KAMCO) • 01/2024 - 07/2024

Kerala Agro Machinery Corporation Limited

It's a government project for Kerala Agro Machinery Corporation Limited. Our Application provides a complete service booking platform to users. Mobile app for customers to book their service for their machineries. Admins can review and assign technicians to that service.

Integrated payment gateway (Razorpay) for secure transaction processing and ensured a smooth user experience for customers.

Utilized Laravel to build a dynamic and user-friendly backend interface, React for frontend.

Kanipayyur astrology • 11/2023 - 01/2024

It provides users to ask their nallaneram, vasthu, etc., to kanipayyur. And also provide appointment booking to meet them and ask questions directly. Users can directly interact with kanipayyur from anywhere in the world.

Tiatele • 01/2020 - 05/2020

Tiatele is a comprehensive, HIPAA, NABH, and GDPR compliant telehealth platform that provides telemedicine software & hardware devices enabling healthcare providers to securely connect with patients from a remote location in real-time. Examine patient's physical condition and measure their vitals. Access patient health records through an integrated EHR. Prescribe treatment via e-prescription tools.

TiaNumr • 05/2020 - Present

TiaNuMR is hospital management software (HMS). TiaNuMR is integrated with electronic patient health records (EHR), includes enterprise resource planning (ERP) modules, and also has an in-built telemedicine functionality. TiaNuMR is HIPAA, GDPR, and NABH compliant with secure video consults and encrypted chat features.

Online shopping management software • 03/2019 - 12/2019

It's an ERP software for managing an online shopping company. Different modules in this project handle the different areas of the company.

Used Laravel to build both the front-end and back-end, delivering a dynamic and responsive user interface.

EDUCATION

Bachelor in Computer Application

Nirmala College Of IT • Chalakkudy

CERTIFICATIONS

Node.js API Masterclass With Express & MongoDB • 12/2024 – Present

Udemy
