

Anjana Sivadas

Sr. Software Engineer

Results-driven Software Engineer with over 4+ years of experience in developing and maintaining software applications. Proven expertise in leveraging modern programming languages and frameworks to deliver high-quality solutions. Adept at collaborating with cross-functional teams to analyze requirements, develop technical specifications, and implement scalable software solutions. Committed to continuous learning and staying current with emerging technologies to drive innovation and efficiency.

WORK EXPERIENCE

Innovature Software Labs(P) Ltd • 06/2022 - Present

Senior Software Engineer • Kochi • Full-time

- Led a 6-member development team: tracked tasks, reviewed code, prepared estimates, and requirements. Mentored junior developers, improving their skills and retention.
- Developed maintainable code for complex project components, reducing bug fixes and increasing overall team productivity.
- Ad Platform Integrations: Integrated Google Ads, Yahoo Ads, LINE Ads, Twitter Ads, and Facebook Ads APIs to power comprehensive advertising performance analysis and reporting.
- Troubleshooting: Diagnosed and resolved technical issues, performing deep dives into code and system behavior.
- Innovation: Implemented innovative solutions to enhance software performance, security, and user experience.
- Cross-functional Collaboration: Worked closely with product, design, QA, and operations teams to deliver high-quality software.
- Technical Documentation: Created and maintained technical documentation for internal and external stakeholders.
- Technical Leadership: Provided technical leadership and decision-making, influencing technical direction, and fostering a positive engineering culture.
- Facilitated code reviews, leading to an 18% improvement in code maintainability and 10% enhancement in the team's coding proficiency.
- Big Data Reporting: Built scalable data pipelines with Google Big Query for fast, campaign-level metrics and insights.
- Chat & Collaboration Integrations: Connected third-party chat services (Google Chat, Lineworks, Chatworks, Slack) for real-time alerts and team collaboration.
- Used version control systems for managing code changes and collaboration.
- Agile Delivery & Collaboration: Followed Agile practices using Jira, Confluence, Asana, and Slack. Coordinated feature delivery to cut post-release defects by 15% and lift team productivity by 20%.
