

ANTONY SCARIA

SOFTWARE DEVELOPER

antonyscaria0904@gmail.com

DEIRA,DUBAI/UAE

Phone:+971559982489

PROFILE SUMMARY

Software Developer with 8 years of hands-on experience in designing, developing, and deploying robust web and desktop applications. Proficient in full software development life cycle (SDLC), with expertise in languages such as Java, Python, JavaScript, and C#. Skilled in frameworks like React, Angular, .NET, and Spring Boot, with a strong command of database systems including MySQL, PostgreSQL, and MongoDB. Adept at collaborating with cross-functional teams, translating business requirements into scalable technical solutions, and maintaining high code quality through clean architecture and testing. Known for delivering projects on time, optimizing performance, and continuously adopting new technologies to improve efficiency and user experience.

Academic qualifications

- Masters in Computer Application-APJ Abdul Kalam University,Kerala,India 2022
- Bachelors in Computer Application-MG University,Kerala,India 2019
- Pre university-Little hearts school,Ernamkulam,Kerala,India 2016

Additional Qualifications

- AWS Academy graduate in cloud foundations-issued by Amazon Web Services(AWS) 2021
- Blockchain Essentials -issued by Cognitive Class (IBM Developer Skills Network) 2021
- Web Development Workshop certificate issued by ShapeAI 2021

Work Experience

Software Developer And AWS Manager Akarat.com,Business Bay,Dubai

2025 - Present

- **PHP Development** – Built dynamic and responsive web applications using PHP.
- **Backend Maintenance** – Handled updates, optimization, and troubleshooting of backend systems.
- **API Management** – Developed and maintained RESTful APIs for seamless frontend-backend communication.
- **Database Integration** – Connected applications to MySQL or other databases for data storage and retrieval.
- **Code Debugging** – Identified and fixed bugs to ensure smooth application performance.
- **Version Control** – Used Git for source code management and collaboration.
- **Security Implementation** – Applied secure coding practices to protect applications from vulnerabilities.
- **AWS Maintenance**– Applied secure coding practices to protect applications from vulnerabilities.

Software Developer
Stealth Guard,Kerala,India

2024-2025

- **PHP Development** – Built dynamic and responsive web applications using PHP.
- **Backend Maintenance** – Handled updates, optimization, and troubleshooting of backend systems.
- **API Management** – Developed and maintained RESTful APIs for seamless frontend-backend communication.
- **Database Integration** – Connected applications to MySQL or other databases for data storage and retrieval.
- **Code Debugging** – Identified and fixed bugs to ensure smooth application performance.
- **Version Control** – Used Git for source code management and collaboration.
- **Security Implementation** – Applied secure coding practices to protect applications from vulnerabilities.

Solution Architect

Sysitco Technologies,Kerala,India

2023-2024

- **Project Leadership** – Led end-to-end ERP development using CodeIgniter and Laravel frameworks.
- **Architecture Design** – Structured scalable, maintainable application architecture for business needs.
- **Issue Resolution** – Diagnosed and solved complex development and integration issues.
- **Requirement Analysis** – Created detailed user stories to align technical solutions with business goals.
- **Client Communication** – Acted as key liaison between technical teams and clients for smooth collaboration.
- **Solution Delivery** – Ensured successful delivery of final solutions, meeting quality and functionality expectations.
- **Technical Planning** – Defined technology stacks, frameworks, and development standards for projects.

Systems Engineer

Malayala Manorama,Kerala,India

2022-2023

- **Server Maintenance** – Performed routine server updates, monitoring, and performance tuning.
- **.NET Development** – Developed and supported applications using the .NET framework.
- **System Support** – Provided technical assistance for software, OS, and network issues.
- **Hardware Troubleshooting** – Diagnosed and resolved desktop, server, and peripheral hardware problems.
- **Deployment Management** – Handled installation and configuration of systems and applications.
- **Network Configuration** – Assisted in setting up and maintaining local and remote network systems.
- **Security Monitoring** – Ensured systems are secure through patch management and access control.

- **Web Development** – Built dynamic websites using Core PHP and CodeIgniter tailored to client needs.
- **Mobile App Development** – Created cross-platform mobile applications using Flutter.
- **Framework Expertise** – Utilized CodeIgniter for fast, lightweight PHP development.
- **UI/UX Implementation** – Designed user-friendly interfaces for web and mobile platforms.
- **Client Collaboration** – Worked directly with clients to gather requirements and deliver custom solutions.
- **Project Delivery** – Managed complete project lifecycle from concept to deployment.
- **Bug Fixing and Updates** – Handled post-launch maintenance, updates, and debugging.

Technical Skills

- | | |
|--------------------------|-------------------------|
| • PHP | • Unit Testing Code |
| • JavaScript | • Debugging Agile & |
| • Python | • Scrum User Story |
| • Laravel | • Creation Application |
| • CodeIgniter | • Security API Security |
| • Full-Stack Development | • Database Optimization |
| • Responsive Design | |

Projects

- Hotel Management System - .NET-based app for booking, customer and room management.
- Leave Management System - Academic project to apply, approve, and track employee leaves.
- E-Movie Booking - Booking app with seat selection and confirmation.
- School Management UI - Front-end for dashboards and scheduling system, - Foodies World - UI/UX restaurant order design system.
- WayFarer - Tourist and guide allocation portal with filters and availability check(CodeIgniter)
- Travel Buddy - ASP.NET web app for package and itinerary bookings,
- Vehico_App - Roadside assistance Flutter app with map and SOS features,
- E-Wallet - Flutter app to share visiting cards and enable payments,
- Prayer Bell - Laravel-based church directory and event listing,
- Oryx - API-driven travel activity booking backend (CodeIgniter),
- Jwalathi - Hotel, cab, flight booking web+API system in CodeIgniter,
- Dadi - MLM system with ChatGPT-based profile sketching (CodeIgniter),
- Eshop - Full e-commerce platform with admin and payment gateway

Strengths

- **Problem-Solving** – Ability to analyze complex issues and develop efficient, logical solutions.
- **Adaptability** – Quickly learns new technologies and adjusts to changing project requirements.
- **Attention to Detail** – Writes clean, error-free code and thoroughly tests applications.
- **Collaboration** – Works effectively within teams, communicating clearly with developers, designers, and stakeholders.
- **Creativity** – Crafts innovative solutions and user-friendly application designs.
- **Analytical Thinking** – Breaks down technical problems into manageable components.
- **Time Management** – Prioritizes tasks and meets deadlines in fast-paced environments.
