## Summary

Innovative and results-driven Lead Engineer with over 8 years of experience in designing and developing high-performance web applications. Proven expertise in PHP, Python, and Go, with significant contributions to projects using Laravel, Django, and Vue.js. Skilled in leading and mentoring technical teams, architecting RESTful services, and delivering exceptional code quality.

## Skills

**Programming Languages:** PHP, Python, Go

**Frameworks & Technologies:** Symfony, Laravel, CodeIgniter, Django, Vue.js, AngularJS, jQuery

**CMS & LMS:** Moodle, Craft CMS

**Development Practices:** TDD, CI/CD, Agile Methodologies, REST API Development, Object-Oriented Design, SOA, Microservices

**Version Control:** Git, GitLab CI/CD, Git Actions

**Testing:** PHPUnit

**APIs & Integrations:** Swagger, Twilio, Google Maps API, Facebook Graph API, Amazon S3, SSO, SAML, ADFS, Active Directory

**Containerization & Cloud:** Docker, AWS

**Project Management:** Jira, ClickUp

## Experience

**Qburst** Nov 2020 - Present  
Lead Engineer  
Kochi  
<https://qburst.com>

- Led the design and development of enterprise applications using PHP, LAMP stack, JavaScript, jQuery, CSS, HTML.
- Identified and resolved client issues, documented solutions, and established QA procedures.
- Ensured exceptional code quality and thorough testing at both unit and system integration levels.
- Developed REST API services for mobile applications and integrated third-party APIs and payment services.

**Cubet Techno Labs** Jan 2019 - Nov 2020  
Software Engineer  
Cochin Area, India  
<https://cubettech.com/>

- Developed advanced database-driven websites and systems including eCommerce, LMS, and Customer Feedback Systems using Vue.js and Laravel.
- Ensured use of best practices and maintained thorough project documentation.
- Handled MySQL databases and third-party integrations efficiently.

**WebCastle** Dec 2017 - Jan 2019  
Software Engineer  
Kochi Ernakulam Kerala  
<https://webcastletech.com/>

- Developed and maintained backend systems for advanced database-driven websites using PHP and MySQL.
- Managed project lifecycle from analysis and design to development and enhancement.
- Troubleshoot and maintained core product software and databases.

**iBees Technologies** Jun 2017 - Dec 2017  
Web Developer  
Cochin Area, India

- Integration of user-facing elements developed by front-end developers
- Build efficient, testable, and reusable PHP modules
- Develop and deploy new features to facilitate related procedures and tools if necessary
- Develop CMS components
- Design, develop, document, and debug sites

**Velox Innovations** Jun 2015 - Mar 2017  
Project Engineer  
<https://veloxinnos.com/>

- Designed embedded systems software by applying key principles of computer science, engineering, and mathematical analysis.
- Coordinated with design, development, testing, and implementation teams to plan and complete assigned projects within deadlines.
- Worked with a cross-functional team to share technology across departments to improve operational efficiency.

## Education

**Thejus Engineering College, Thrissur** 2011 - 2015  
Electronics and Communication Engineering  
Bachelor's Degree

**IHRD, Palakkad** 2009 - 2011  
Electronics  
Intermediate

**Technical High School, Thrissur** 2007 - 2009  
Technical High School Leaving Certificate  
Secondary School Certificate

## Projects

**Legal Services Platform** November 2023 - Present

A comprehensive online platform providing diverse legal services across the U.S., designed to enhance public access to legal resources through innovative technology solutions.

- Developed and maintained scalable backend services using Laravel, Lumen, and Django, focusing on long-term maintainability.
- Designed and implemented RESTful APIs to ensure seamless integration and communication between different application components.
- Managed CI/CD pipelines using GitLab CI/CD, automating testing and deployment processes to increase efficiency and reduce errors.
- Authored and maintained comprehensive unit tests with PHPUnit to uphold high standards of software reliability and performance.
- Oversaw database management using MySQL and PostgreSQL, optimizing architecture for high efficiency and data integrity in demanding environments.
- Fostered a collaborative agile development environment, guiding the team through development challenges and ensuring cohesive project progression.

PHP, Laravel, Lumen, Django, MySQL, PostgreSQL, REST API, GitLab CI/CD, PHPUnit

**Open Financials (Banking Stack)** Jun 2022 - Nov 2023

Neo-banking platform providing business accounts for small business owners with features like payment collection, auto-reconciliation, seamless payouts, integrated payment gateway, automated accounting, and expense management.

- Built highly available, secure, distributed systems in a microservices architecture.
- Operated external customer-facing systems with stringent service-level agreements.
- Troubleshoot, tested, and maintained core product software and databases for optimization and functionality.

Python, Django, Ajax, Rest Framework, API, PostgreSQL, Laravel, Lumen, Microservices

**Sunlyt Crowdfunding App Development** Mar 2022 – Jun 2022

A mobile-friendly web application for users to search for campaigns and donate. Admins create campaigns, users can suggest campaigns, and nominate beneficiaries. The admin selects the beneficiary after a manual review process.

- Provided estimations for assigned tasks and defined technical requirements.
- Integrated functionalities like SendGrid for email campaigns and error logging using Sentry.
- Developed and deployed new features as per requirements using Django and AJAX for dynamic content updates.
- Developed and integrated REST APIs using Django Rest Framework.
- Coordinated with the team to understand requirements and provide technical solutions.

Python, Django, Ajax, Rest Framework, API, PostgreSQL, SendGrid, Sentry

**Asset Management Project** Jan 2021 – Feb 2022

A FOSS project for IT asset management, tracking asset lifecycle from requisition to disposal. Helps see which assets are assigned, their physical location, and provides automated reports for management.

- Fixed major performance issues and optimized system efficiency using PHP and Laravel.
- Integrated SSO using Keycloak and OneLogin.
- Implemented dynamic queue prioritization logic using Laravel Queues.
- Migrated monolith application to microservices architecture.
- Improved overall system performance by fixing issues and implementing new features.
- Communicated with clients to understand and implement requirements.
- Developed and integrated REST APIs for various functionalities.

PHP, Laravel, jQuery, Ajax, MySQL, API, Keycloak, SSO, Pentaho

**PiQup** Nov 2020 – Jan 2021

An app for essential commodity ordering and pickup scheduling to ensure social distancing and crowd control.

- Integrated Facebook APIs for social login functionality.
- Implemented Keycloak SSO login for secure access.
- Communicated with team members for seamless development and deployment.
- Developed new features and enhancements using Laravel and jQuery.
- Created and documented APIs for internal and external use.
- Developed and integrated REST APIs for various functionalities.

PHP, Laravel, jQuery, Ajax, MySQL, Facebook API, Keycloak

## Achievements and Personal Insights

### Co-Curricular Achievements

- Finalist**, International-level Robotics Programming Competition, Tryst 2016, IIT Delhi.
- Second Position**, Arduino Programming, Tryst Zonal Rounds, Jyothi Engineering College.
- Fourth Position**, Robotics, Tryst Zonal Rounds, Thejus Engineering College.

### Personal Insights

- Languages:** Fluent in Malayalam, English, Tamil.
- Hobbies:** Enjoys driving, swimming, off-roading, trekking, fitness training, watching movies, and traveling.
