

Aryan Chaurasia

BACKEND DEVELOPER

aryanchaurasia.web@gmail.com | +91 6392829798 | Sector-81, Noida, UP, 201307

Profile Summary

Experienced and detail-oriented **Backend Developer** with 2 years of expertise in building scalable web applications. Skilled in **PHP, Laravel, Python, MySQL, and RESTful APIs**, with additional exposure to full-stack development. Adept at designing optimized databases, writing clean backend logic, and collaborating with teams to deliver reliable, high-performance solutions. Successfully **delivered 10+ live projects** across diverse industries.

Experience

YES IT Labs. Pvt Ltd (Present)

Aug 2024 – Present

- Developed and maintained scalable backend systems using PHP and Laravel.
- Built RESTful APIs and integrated third-party services including **Ixkio** (NFC Tag Authentication) and multiple **payment gateways** (Stripe, Razorpay, etc.), **Shiprocket** (Automated Shipping).
- Collaborated with front-end and product teams to deliver secure, production-ready applications.

K and A Technology. (1 Year)

Feb 2023 – Feb 2024

- Built and maintained ERP and e-commerce websites using PHP, Laravel, and JavaScript.
- I Assisted in integrating APIs and improving application performance across multiple modules.

Live Projects

10+ live projects delivered with focus on backend architecture, optimized databases, and scalable APIs.

Key projects:

NFC Media (PWA/Admin) [Feb 2025 - July 2025]

www.pwa.tagis.fi

- Developed and integrated RESTful APIs in Laravel to support the digital rewards platform.
- Implementing **Ixkio** NFC scans to monitor and reward users.
- Implemented coupon and loyalty card logic, enabling users to receive rewards based on NFC scans.

Nextpet Website [Aug 2024 - Mar 2025]

www.nextpetapp.com

- Developed the **Admin Panel** (front-end and back-end) using **Laravel**, to manage user and breeder
- Built and integrated RESTful APIs to support breeder and user panels across React.js web and Android/iOS apps.
- Ensured secure data flow, optimized queries, and smooth integration between all panels (Admin, Breeder, User).

Voolayvoo-app – Event Collaboration Platform [Oct 2024 - Jun 2025]

www.voolayvooapp.com

- Designed and developed a **4-panel system** – **Business** (event creation & management), **Promoter** (Vooon sales), **User** (ticket purchase via Vooons), and **Admin** (platform oversight & management).
- Built the **Admin Panel** entirely in **Laravel**, ensuring secure and efficient management workflows.

ERP Whizz – Enterprise Resource Planning System [Jul 2023 – Feb 2024]

- Developed a comprehensive **ERP system** to manage day-to-day business operations, including **invoicing, product returns, payment settlements, due amount collection, supplier management, roles & permissions, and error product handling**.
- Contributed to building and maintaining **core modules (CR points)** and worked on enhancing advanced ERP features for scalability and reliability.

Technical Skills

- **Backend:** PHP, Laravel, RESTful APIs, Payment Gateway Integration (Stripe, Razorpay, etc.), MySQL.
- **Frontend:** HTML5, CSS3, Bootstrap, JavaScript (ES6+), jQuery, JSON, AJAX.
- **Programming Languages:** C, C++, Python, Php, Javascript.
- **Python & Data Science:** Python, NumPy, Pandas, Matplotlib, Web Scraping, Machine learning.
- **Generative AI:** LangChain (Gen AI Applications).

Education

IMS Engineering College Ghaziabad (A.K.T. University)

Jul 2020 – Jun 2024

- BTech (Information Technology) - Software Engineering
