

ASWIN S

Software Engineer

As a seasoned Software Engineer specializing in Laravel and Node.js development, I bring a wealth of experience in crafting robust and scalable web applications. With a strong foundation in both back-end and front-end technologies, I have successfully contributed to the development and deployment of innovative solutions that meet and exceed client expectations. With a passion for clean and maintainable code, dedication to staying current with industry trends, and a results-driven mindset, I am poised to leverage my skills in Laravel and Node.js development to contribute to dynamic and challenging projects, driving innovation and excellence in web application development.

PUBLICATIONS AND PRESENTATIONS

- **Product-Analysis-with-Failover-System-And-Heartbeat-Monitoring:-**
Developed a robust system combining PHP Laravel for product analysis and Python for product similarity calculations. Implemented a failover system using Docker and Consul, ensuring uninterrupted service and reliability through automatic failover and load balancing. Integrated Flask-based load balancer with Consul for heartbeat monitoring and service continuity.
[GitHub:](https://github.com/aswinsasi/product-ananlysis-failover) <https://github.com/aswinsasi/product-ananlysis-failover>
- Conducted seminar report about **Optical computer technology**
- Developed console applicaton for **Fee Report Management System**.
- Developed online website for Education Institute Management System in **JSP, SERVLET and MySql** using **BOOTSTRAP** framework in **CSS , JavaScript and HTML**.
- Created project report and online application for Online Lawyer Client Intraction System in **PHP and MySql**
- Developed online website for Education Institute Management System in **PHP, and MySql** using **BOOTSTRAP** framework in **CSS , JavaScript ,AJAX and HTML**
- Blogging Site using **PHP , MySql and Codeigniter Framework**.
- Created project report and mini online application for Online Voting System in **PHP and MySql** for College students.
- Own E-commerce Site using **PHP, MySQL, JSON , BOOTSRAP and JavaScript(www.cartme.in)**.
- Own Education Site using **PHP, MySQL, JSON , BOOTSRAP and JavaScript(www.crescentedutech.com)**.
- Experince with Kalilinux and parrot Os work with **Metasploit framework , used linux tools like jackripper, ngrok, BurpSuit, sqlmap etc.and github repositories**.
- Published a package for supporting billplz payment gateway wrapper (v3) in node language inside <https://www.npmjs.com> npm install asw-billplz
- Created project report and online application for Online polling system in svelte Language.
- Published Package on **Laravel News** about **Route Security Protector**
This middleware for Laravel stops SQL and LDAP injection attacks, keeping your apps secure. https://www.linkedin.com/posts/laravel-news_github-aswinsasiinjection-protector-a-activity-7254628200109023232-vl-b?utm_source=share&utm_medium=member_desktop
