PROFILE

Laravel Full Stack Developer with 2+ years of experience designing and building scalable backend systems using Laravel, RESTful APIs, and MySQL. Proven ability to optimize performance, implement secure authentication, and integrate third-party services. Experienced in React.js for dashboard development, Agile methodologies, and CI/CD workflows. Committed to delivering clean, maintainable, and high-performance solutions.

TECHNICAL SKILLS

- Backend: PHP, Laravel, REST APIs
- Frontend: React.js, JavaScript, jQuery, HTML5, CSS3, Bootstrap
- Database: MySQL, SQL
- Tools: Git, GitHub, Postman, Docker, CI/CD
- Concepts: MVC, OOP, Authentication, RBAC, API Integration
- Other: Razorpay Integration, Queue Jobs, Deployment & Release Management

EXPERIENCE

Laravel Full Stack Developer

Mediezy Technologies, Kochi | Nov 2023 – Present

- Designed and developed scalable backend systems using PHP and Laravel following MVC architecture.
- Built and integrated RESTful APIs for enterprise and healthcare applications.
- Implemented Laravel Jobs, Queues, and background processing to improve performance and reduce API latency.
- Optimized MySQL queries, improving API response time by up to 30%.
- Developed admin dashboards and reusable UI components and integrated backend APIs.
- Integrated third-party services including Razorpay payment gateway and notification systems.
- Provided production support, debugging, and performance tuning.
- Designed and implemented secure RESTful APIs using JWT and session-based authentication, ensuring robust user access control.
- Built scalable API architecture with versioning and modular structure to ensure long-term maintainability.

PROJECTS

Healthcare Management Platform

- Built a comprehensive healthcare system enabling appointment scheduling, prescription management, and lab workflows.
- Designed modules for patient records, doctor availability, and clinic operations management.
- Implemented real-time notifications for appointment updates and prescription alerts.
- Developed multi-role access system for doctors, patients, and administrators.
- Structured APIs to support scalable healthcare workflows and data consistency across modules.

Executive Tracking & Order Management System

- Developed an enterprise workflow platform to manage tasks, orders, and team activities across departments.
- Designed role-based dashboards for Executives, Managers, and Admins to monitor operations.
- Implemented order lifecycle management including creation, approval, and tracking processes.
- Built reporting features for performance tracking and operational insights.
- Enabled centralized system for task assignment, progress tracking, and team coordination.

EDUCATION

- MCA – Amal Jyothi College of Engineering, Kanjirappally | 2023
- BCA – St. Antony's College, Peruvanthanam | 2021
