Professional Summary

I'm a Senior Software Engineer with 8+ years of experience in building scalable web applications and robust backend systems. I specialize in object-oriented programming (OOP), RESTful API development, and system architecture, primarily using PHP, Laravel, Vue.js, and MySQL. I've successfully led development teams and delivered full-cycle projects that solve real-world business problems across domains like CRM, Healthcare, Tourism, and Education.

I'm proficient in API integrations and cloud deployments on AWS. My experience spans working with tools like Git, Bitbucket, and Jira, and building secure, maintainable systems aligned with agile methodologies.

In addition, I hold certifications in **Power BI & Data Analytics** and have worked on projects involving **data modeling, dashboards, and interactive reports** to help businesses gain actionable insights and improve decision-making.

Technical Skills

- **Languages & Frameworks:** PHP, Laravel, CodeIgniter, WordPress, Shopify, JavaScript, Vue.js, jQuery, HTML, CSS, Bootstrap
- **Databases:** MySQL, MongoDB
- **Tools & Platforms:** Git, Bitbucket, GitHub, Jira, Zoho, TeamWork Power BI, Cloudways
- **Others:** REST and SOAP APIs, Payment Gateway Integration, Optimization, Agile Methodology

Certifications

- Harnessing the Power of Data with Power BI – Microsoft Power BI Data Analysis
- Data Modeling in Power BI = Star & Snowflake Schemas, DAX Calculations, and Performance Optimization
- Data Analysis and Visualization with Power BI - Star & Snowflake Schemas, DAX Calculations, and Performance Optimization
- Extract, Transform and Load Data in Power BI – ETL Processes & Data Transformation
- Preparing Data for Analysis with Microsoft Excel – Excel Data Preparation & Analysis

Professional Experience

Freelance Technical Consultant and Data Analyst | Gobyte Technologies LLP | Aug 2024 – Present

- Developed secure RESTful APIs using Laravel Passport and Sanctum
- Built scalable Laravel and React.js-based applications
- Managed client interactions, requirements gathering, and remote deliveries
- Integrated third-party APIs including payment gateways and CRMs
- Oversaw access control, user roles, and credentials handling
- Maintained AWS servers and optimized cloud deployments
- Conducted testing, debugging, and peer reviews following agile practices

Senior Software Engineer | 2Base Technologies Pvt. Ltd. | May 2021 – Jul 2024

- Led team of developers in project execution and sprint planning
- Upgraded legacy systems and optimized backend performance
- Implemented third-party API integrations and credential policies
