

DEBASHISH MANDOL

Backend Engineer | Laravel | AWS | Certified Ethical Hacker
Delhi, India | +91-8447118561 | Debashish2599@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Security-focused Backend Engineer with 4+ years of experience delivering enterprise-scale applications in IT services environments. Strong expertise in Laravel, MySQL performance optimization, and AWS cloud deployments. Proven track record of maintaining 99.9% uptime for 10k+ user platforms and architecting high-throughput systems managing 100M+ records. CEH certified professional committed to OWASP-compliant development within Agile/Scrum lifecycles.

TECHNICAL SKILLS

Languages: PHP (Laravel, CodeIgniter), Python, JavaScript, SQL

Database: MySQL (High-Write Workloads), Sharding, Advanced Indexing, Query Optimization, Redis

Cloud & DevOps: AWS (EC2, RDS, S3, IAM), Linux, Nginx, Git, CI/CD

Security: CEH, OWASP Top 10, JWT, OAuth2, SSL/TLS, AES Encryption

Methodology: Agile/Scrum, Jira, SDLC, Swagger/Postman, Unit Testing

PROFESSIONAL EXPERIENCE

Backend Developer

NetMaxims Technologies, Faridabad | Aug 2023 – Present

- Led backend development for 30+ enterprise-grade REST APIs, improving API response time by 40% and reducing database load by 35% through indexing and execution plan optimization.
 - Managed AWS infrastructure (EC2, RDS, S3, IAM), ensuring 99.9% application uptime and secure role-based access control.
 - Implemented JWT-based authentication and followed OWASP secure coding standards to strengthen system security.
 - Worked in Agile/Scrum environment, collaborating with Frontend, QA, and DevOps teams and maintaining API documentation using Swagger/Postman.
-

Backend Developer

Yatharthriti IT Services, Faridabad | Aug 2021 – Aug 2023

- Contributed to Government LMS platform serving 10,000+ active users, ensuring system stability and high availability.
 - Improved backend throughput by 30% through Linux server tuning and MySQL query optimization.
 - Resolved 100+ critical production issues, minimizing downtime and enhancing platform reliability.
-

KEY PROJECTS

High-Volume IoT Data Platform | Laravel, MySQL, AWS

- Architected high-throughput MySQL schema handling 100M+ records for IoT workloads.
- Achieved sub-200ms API latency using database sharding and advanced indexing strategies.
- Improved ingestion and query performance by 80% through schema restructuring and optimization.

GainNigeria LMS | PHP, Moodle, Linux

- Stabilized and optimized national-scale LMS platform for 10k+ users, focusing on database concurrency and secure session management.
-

CERTIFICATIONS & EDUCATION

Certified Ethical Hacker (CEH) – EC-Council

Bachelor of Technology (B.Tech) in Computer Science

Echelon Institute of Technology, Haryana
