PROFESSIONAL SUMMARY

Experienced Software Engineer with over 8 years of expertise in PHP and Yii2. Skilled in designing, developing, and maintaining scalable web applications, E-commerce platforms, and MLM systems. Proven ability to improve user experience, optimize performance, and integrate third-party services like Payment Gateways and APIs. Strong background in database design, security implementation, and team collaboration.

WORK EXPERIENCE

Software Engineer

April 2023 - Present

Stealth Guard PVT LTD | Thiruvananthapuram, India

- Developed and maintained web applications using PHP, ensuring scalability, security, and optimal performance.
- Designed and managed MySQL databases, optimizing queries to improve application efficiency.
- Delivered end-to-end solutions for MLM platforms, creating custom back-end features with PHP and Yii2.
- Built and maintained RESTful APIs to enable integration with front-end applications and third-party services.
- Implemented caching mechanisms with Redis and Memcached to enhance application performance.
- Ensured robust application security by implementing best practices such as SQL injection prevention, XSS protection, and CSRF mitigation.
- Mentored junior developers, encouraging knowledge sharing and fostering team collaboration.
- Stayed updated with industry trends and technologies to drive continuous improvement in development workflows.

PHP Developer

May 2022 - April 2023

Intersmart Soutlion PVT LTD | Kochi, India

- Specialized in end-to-end solutions for E-commerce platforms, implementing back-end functionality with PHP and Yii2.
- Collaborated with front-end teams to integrate user interfaces with back-end functionality, ensuring responsive web applications.
- Successfully integrated third-party APIs and Payment Gateways, improving platform functionality and user engagement by 15%.
- Developed and optimized web applications, ensuring scalability and efficient data management.

Software Engineer

Aug 2016 - May 2022

ProBytes Software PVT LTD | kamaleswaram, Trivandrum, India

- Implemented real-time GPS tracking features for student transport systems using Google Maps API and geolocation services.
- Designed and developed secure user authentication and role-based access modules for parents, drivers, and administrators.
- Developed dynamic dashboards to display vehicle location, ETA, and alerts for enhanced monitoring and communication.
- Conducted rigorous testing and debugging to ensure performance, security, and reliability of transport applications.
- Integrated third-party APIs and Payment Gateways, enhancing user experience and platform functionality.

Software Engineer

June 2014 - Aug 2016

Trinity Technologies PVT LTD | kamaleswaram, Trivandrum, India

- Developed CMS-based websites using PHP and HTML.
- Made it easy for admins to add and update website content.
- Designed clean and simple layouts for better user experience.
- Connected websites to databases for storing and managing content.

PROJECTS EXPERIENCE

Track School Bus

This project involves the development of a GPS-based school bus tracking system aimed at enhancing student safety. The system provides real-time updates on the location of school buses, allowing parents and school administrators to monitor the movement of buses efficiently. Key features include live bus tracking, route monitoring, estimated arrival times, and alerts for pick-up and drop-off points. The solution helps ensure that students travel safely to and from school by offering visibility and peace of mind to guardians and school authorities.

Kids Express

Kids Express is a mobile application designed to ensure the safe and reliable transportation of school-going children. The app serves as a communication bridge between parents, school staff (such as tutors or coaches), and private cab operators. It provides features like real-time cab tracking, instant notifications, and secure communication to keep all stakeholders informed. The solution enhances transparency and coordination, ensuring that children are transported safely while keeping parents and school personnel updated at every stage of the journey.

Emirates Transport

Emirates Transport is a transportation management system developed to deliver safe, reliable, and high-quality transport services. The project focuses on ensuring the highest standards of safety, customer service, and operational efficiency. It includes features such as real-time vehicle tracking, route optimization, driver performance monitoring, and communication tools to enhance coordination between service providers and clients. The system also supports employee management and fosters positive employee relations, ensuring a smooth and professional transport experience.

EDUCATION

MSC Software Engineering

Aug 2009 - June 2014

Narayana Guru College of Engineering (Manjalumoodu, TN)

TECHNICAL SKILLS

- **Languages:** PHP, JavaScript, HTML5, CSS3
- **Frameworks:** Yii2, jQuery
- **Database:** MySQL, PostgreSQL
- **Tools/Technologies:** RESTful API, MVC Architecture, Ajax, Git, Redis
- **Development Practices:** OOPS, Performance Optimization, Caching, Security Best Practices
- **Other Skills:** Version Control (Git), Debugging, Team Leadership, Cross-functional Collaboration
