GPS Tracking System (PHP & MySQL)

Tracking System is ideally developed for school/college buses. In the system with the help of a gps device placed on bus which sends the latitude and longitude of place at a regular interval. In our local machine with the help of a usb dongle receive the coordinates and insert into the database. Then sends text message to students on corresponding bus before 5 minutes of their boarding point. If the route is diverted also sends a text message with place. The parents can know the current location by sending text message to mobile no.

Roles and Responsibilities

- Designing the user interface.
- Database Design
- Coding(PHP)
- Testing the Application.

EDUCATIONAL QUALIFICATIONS

- Msc Computer Science
MG University, Kerala.
- Bachelor of Computer Application,
MG University, Kerala
- Vocational Higher Secondary in Computer Science
Dept. Of Vocational Higher Secondary, Kerala
- THSLC
Dept. Of Technical Education, Kerala

PERSONAL DETAILS
