Software Engineer

Highly motivated and experienced Software Engineer with a proven track record of successfully migrating legacy systems from Core PHP to Laravel. Expertise spans Core PHP, Laravel, and Node.js (Express.js), coupled with strong front-end skills in React.js and Next.js. Experienced in seamless frontend-backend integration using Inertia.js, building cohesive full-stack applications with smooth data flow between server and client layers. Specialized in developing CRM, LMS, and CMS platforms. Proficient in MySQL. Demonstrated ability to quickly learn and transition to new technologies.

Professional Experience

Axel Technologies Dec 2025 – Feb 2026

Software Engineer

- Actively involved in the rewrite of an existing lead management system, handling the integration between the Laravel backend and React frontend using Inertia.js.
- Bridged server-side and client-side layers by implementing Inertia.js-based data flow, ensuring smooth communication between Laravel controllers and React components.
- Refactored and rebuilt specific modules of the legacy system, improving code structure, maintainability, and overall application performance.

Esight Business Solutions Apr 2024 – Jul 2025

Back-End Developer

Delivered critical back-end solutions, contributing to the successful completion of various projects. Focused on developing efficient and maintainable code using Core PHP and Laravel. Actively participated in problem-solving and debugging, ensuring system stability and performance.

- Spearheaded technology stack modernization: Successfully led the migration from Core PHP to Laravel, resulting in significantly improved system performance and efficiency.
- Developed and maintained scalable and secure back-end systems: Engineered robust back-end APIs, ensuring scalability and security for critical applications.
- Drove significant technological advancements: Played a key role in upgrading the company's technology stack, adopting and implementing modern frameworks.
- Provided cross-functional technical expertise: Offered expert assistance to the frontend team in implementing modern JavaScript frameworks, ensuring seamless integration between front-end and back-end systems.

NOSCE Techno Solutions Jul 2023 – Mar 2024

Full Stack Developer (Internship)

- Gained hands-on experience in building dynamic web applications.
- Worked on both frontend (HTML, CSS, JavaScript) and backend (PHP, MySQL) development, enhancing problem-solving skills.
- Strengthened understanding of full stack workflows and modern web development practices.

Skills

Back-End: Laravel, Core PHP, Node.js (Express.js), RESTful APIs, MySQL, MySQLi, Database Design

Front-End: React.js, Next.js, JavaScript, HTML5, CSS3

Tools: Git / GitHub, Postman

Soft Skills: Team Leadership, Project Management, Problem-solving, Communication, Rapid Technology Adoption, Technology Transition

Education & Certifications

B.Tech in Computer Science | Thejus Engineering College (CGPA: 7.5/10) | 2019–2023

Higher Secondary | St. Thomas College HSS Thrissur | 2017–2019

Projects

CRM (Core PHP, MySQL)

- The tool enables project managers and admins to track the live status of projects, including progress, milestones, and potential bottlenecks, ensuring timely updates and decision-making.
- It serves as a centralized repository to store and manage all project-related details, such as client information, timelines, deliverables, and documentation, improving accessibility and organization.
- The system allows managers to monitor team members' daily tasks, assign responsibilities, and track completion rates, ensuring accountability and efficient workload distribution.
- Admins and project managers have custom dashboards with analytics, reporting, and alerts to oversee team performance, project health, and deadlines, enhancing overall project control.
- Implemented secure user permissions, allowing different access levels for admins, managers, and team members to ensure data security and workflow efficiency.

CMS (Core PHP, MySQL)

- Built dynamic CMS-powered websites with integrated modules for blogs, galleries, news/event listings, and enquiry forms to enhance user engagement.
- Created a custom admin dashboard for easy content updates (blog posts, media galleries, event scheduling) and enquiry form data management.
- Developed responsive, SEO-friendly interfaces for visitors to browse content, submit enquiries, and interact with news/events seamlessly.
- Implemented secure enquiry forms with backend storage (database/email notifications).

Marketplace Application (Next.js, Express.js, MySQL)

- Led the development of a scalable e-commerce platform with advanced features.
- Implemented a sophisticated product listing algorithm, incorporating: Most searched products, Recently searched product suggestions, Real-time user-specific recommendations based on search history.
- Admin panel section to list the category, products and users.

Job Portal – Career Craft (Laravel, Blade, Bootstrap, JavaScript, MySQL) [Ongoing]

- Built Career Craft, a full-featured job portal with dedicated modules for Admin, Seeker, and Employer management.
- Implemented all functionalities through Laravel web routes with controller-based form handling, validations, and session authentication.
- Developed module-specific features such as job posting for employers, job application & profile management for seekers, and full monitoring tools for admin.

- Designed optimized database structures and a clean MVC architecture to ensure secure, scalable, and maintainable operations across all modules.
