Kanjirapally, Kottayam — github.com/fathima686 — linkedin.com/in/fathima-shibu-ab8406354

Profile

MCA student with hands-on experience in UI design, full-stack development, backend APIs, IoT systems, and cloud technologies. Skilled in building user-focused applications with strong problem-solving and analytical ability. Experienced with Agile, version control, and modern development workflows.

Skills & Tools

Programming Languages: C, C++, Java, PHP, Python

Web Technologies: Laravel, HTML5, CSS3

Backend & APIs: REST APIs, PHP

Databases: MySQL, MongoDB

Cloud Platforms: AWS, Google Cloud Platform (GCP)

DevOps & Developer Tools: Docker, Git, GitHub

Testing & Automation: Selenium WebDriver (Java), Automated UI Testing

Soft Skills: Learning, Leadership, Communication, Teamwork, Time Management

Projects

Fit and Match – AR Jewelry Try-On App

Developed an AR-based Android app for virtual jewelry try-on using real-time camera overlay, with accurate placement and a responsive user interface.

My Little Thingz – E-Commerce Gift Platform

My Little Thingz is a website I built for my craft and custom gift business.

Smart Bike Rental System – IoT

Built an IoT-based bike rental system using ESP32 and sensors for dock detection, with cloud-based monitoring, automated billing, and real-time tracking.

Education
