- C
- JAVA
- HTML
- CSS
- JAVASCRIPT
- MySQL

PROFILE

I'm a PHP Full Stack Developer with expertise in building dynamic, scalable, and user-friendly web applications. My skills span across backend development with PHP and frameworks , as well as frontend technologies such as JavaScript, HTML, CSS, and modern libraries. I enjoy solving complex problems, optimizing performance, and delivering seamless digital experiences from concept to deployment.ext

PROJECTS

Contact form with email integration

This project is a Contact Form with Email Integration built using PHP, HTML, and CSS. It allows users to submit their queries or feedback through a simple web form, which is then securely sent to the administrator's email using PHPMailer/SMTP integration.

Student Management System

The Student Management System is a web-based application developed in PHP and MySQL to efficiently manage student information and academic records. It provides features such as student registration, course management, grading, and attendance tracking with separate dashboards for administrators, teachers, and students.

CERTIFICATIONS

- Diploma in PHP Full Stack Development
- Flutter Mobile App Development -Genzee technologies -2023
- Cybersecurity-Tech by Heart
- Bootcamp of web development at Gseven Technologies
