JOB REFERENCE: PROJECT MANAGER

Dear Hiring Manager,

I am writing to express my interest in your company. With over five years of hands-on experience in Software development, API integration, and project leadership, I bring a unique blend of technical expertise and strategic vision that can drive your team's success.

In my current role as Project Manager at CBLU Digital, I spearheaded the end-to-end development of Buktor, a doctor consultation automation platform. Under my leadership, Buktor was recognized by Meta for its WhatsApp chatbot innovation—selected among the top 10 solutions in India—and funded by a third-party buyer for ₹3 Crores within just seven months. Currently doing valuation for 30cr. I led architectural design, development, managed a high-performing cross-functional team, and ran Agile sprints (Jira/Confluence) as Scrum Master to ensure both rapid delivery and continuous improvement.

Prior to that, I worked as a Freelance Web Developer during my maternity period, delivering custom eCommerce websites and portals. This experience honed my client-collaboration skills, rapid prototyping, and ability to drive projects from concept through launch with minimal oversight.

My background also includes roles at Cignes Solutions and Sparrow Solutions, where I built Laravel-based applications, RESTful APIs, admin dashboards, and integrated third-party services. I am passionate about creating scalable, user-centric products that solve real-world problems and mentoring teams to excel technically and collaboratively.

I am excited to join hands with you and help deliver innovative digital solutions. Thank you for considering my application. I look forward to the possibility of discussing how my experience and skills can add value to your team.

Sincerely,

Harsheena N K
