Professional Summary

I am a passionate Software Engineer with over six years and five months of experience in developing robust web applications. I excel at writing clear, maintainable code that prioritizes ease of troubleshooting and long-term sustainability. My background includes collaborating effectively with both small, focused teams and larger, diverse groups across various organizations. Adept at working autonomously from both remote locations and office environments, I adapt seamlessly to organizational needs. I am now seeking to join a dynamic and growing organization where I can contribute my skills and experience to drive meaningful success.

Experience

Subhosting Innovations Private Limited

Thiruvananthapuram

Senior Software Developer

01/2023 - 10/2024

Designed and developed full-stack web applications using React.js, Jest, Node.js, PHP and Laravel, and ensuring seamless integration between front-end and back-end components.

- Implemented RESTful API endpoints for efficient data handling and optimized server-side performance.

Feather Soft Info Solution Private Limited

Ernakulam

Software Developer

09/2018 - 10/2022

Developed backend solutions using a range of technologies, including Apigility, Zend Framework, Laravel, Lumen, and Node.js, ensuring efficient and scalable server-side functionality.

StratAgile Private Limited Technologies

Ernakulam

PHP Developer

11/2017 - 09/2018

Developed and implemented web applications using Core PHP and Laravel, ensuring robust functionality and scalable solutions.

Projects

Workjoe HR Application

HR Application Development

January-2023 - Present

Contributed to the development of a comprehensive HR application designed to streamline all HR activities, including Attendance, Regularization, On Duty, Case Management, and Training. The application supports companies of all sizes, aiming to enhance efficiency and simplify HR operations.

My role involves integrating APIs using PHP Apigility.

Smart Vyvo Mobile App

Health Tracking Application Development

January-2022 - December-2022

Developed the Smart Vyvo Mobile App, a health tracking application that monitors metrics such as heart rate, sleep patterns, and activity levels. The app provides users with real-time data, historical trends, and personalized insights to enhance overall wellness.

My role involves integrating APIs using Node.js and react ts

Future Medicine Academy Application

Online Platform Development

June-2021 - December-2021

Developed an online platform for medical-related courses, featuring two distinct portals: an admin portal for managing course registrations and approvals, and a user portal for course enrollment, payment, and certification.

My role involves managing both the front end and back end using Laravel and React.js.

SmileAsia

Software Solution Development

January-2021 - May-2021

Developed a software solution for SmileAsia Foundation, an organization dedicated to providing free surgeries and medical care for patients with cleft lip and palate conditions in Asia. The application manages patient history, treatment processes, and team performance evaluations.

My role involves managing both frontend and backend development using PHP Laravel, jQuery, AJAX, HTML5, and CSS.

Fiats Scriptura

Web Application Development

August-2020 - December-2020

Developed a web application designed to synchronize with a mobile application for managing registrations of Christian missionary programs. The application features an admin panel for displaying and managing program details and includes a single-page website.

My role involves integrating APIs using Laravel 9.

Cash and Gift Management System

Management System Development

January-2020 - July-2020

Developed a comprehensive system for managing and tracking a company's revenue, costs, and gifts. The application supports staff in accessing loan details and company purchases, while managers oversee gifts and other expenditures.

My role involves integrating the full stack using technologies such as AJAX, jQuery, MySQL, CSS, HTML, and Laravel 5.2 to create a cohesive and functional system.

DECLARATION

- I hereby declare that the information provided in this resume is accurate and true to the best of my knowledge. I am committed to maintaining the highest standards of professionalism and integrity in my work.
- I understand that any misrepresentation or omission of facts may result in disqualification from consideration for employment or dismissal if discovered after hiring.
