Stats

Oct 2021 — Jun 2023

The application, built with React.js, MySQL, and Redis and hosted on AWS, generates statistical reports for insurance organizations, agencies, and individual agents. It is currently used by insurance companies across the USA.

VKC SFA

Nov 2017 — May 2018

SFA (Shop Floor Automation) is a cloud-based platform designed to streamline footwear production across multiple plants in India. Its primary objective is to maximize machine utilization and minimize downtime when changing molds and colors at machine stations.

By analyzing demand inputs, the system maps them to the appropriate machine stations, incorporating preloaded RFID, size, color, and other criteria for seamless automation.

Technologies used: Python, Django, jQuery, MySQL, Git, HTML & CSS.
