

Hadassah Mol Raju

📍 Thrissur, Kerala ✉ molhadassah@gmail.com 📞 +91 9037479476

Professional Summary

Motivated and detail-oriented Computer Science post-graduate with hands-on experience in Artificial Intelligence, Machine Learning, and Web Development. Skilled in building scalable applications using Python, Django, and Laravel, with practical exposure to model optimization techniques. Experienced in developing real-world projects. Passionate about leveraging AI-driven solutions to solve complex problems and continuously enhancing technical expertise.

Education

M.Tech in Computer Science (AI & Software Engineering) Cochin University of Science and Technology (CUSAT)	2024 – 2026
B.Tech in Computer Science Thejus Engineering College	2019 – 2024
Python Full Stack Development Course	Oct 2023 – May 2024

Projects

Post-Training Mixed Precision Quantization using Dynamic Attention-Aware Bit Allocation

- Implemented post-training mixed precision quantization with dynamic attention-aware bit allocation for deep learning model compression.
- Optimized model size, latency, and accuracy using channel-wise importance estimation, adaptive bit-width allocation, and performance benchmarking.

FarmShield – IoT-Based Agricultural Storage Monitoring System

- Developed an ESP32-based system that integrates CO2, temperature, and humidity sensors for real-time storage monitoring.
- Implemented cloud connectivity and alert mechanisms to enable remote tracking and prevent crop spoilage.

Automatic Question Paper Generation System

- Developed a Python-based system using SQLite to generate structured question papers automatically.
- Implemented logic for dynamic question selection based on predefined criteria.

Language Translator System

- Built a machine learning-based translation tool for basic NLP tasks.
- Improved translation efficiency using trained models.

Data Science Projects

- Implemented Hierarchical Clustering and Linear Discriminant Analysis on real-world datasets.
- Analyzed patterns and improved classification accuracy.

QR Code Generator

- Developed a web-based QR generator using HTML, CSS, JavaScript, and Python.
- Enabled dynamic data encoding and real-time generation.

Technical Skills

- **Languages:** Python, JavaScript, CSS,HTML,C,Php
- **Frameworks:** Django, React (basic)
- **Databases:** MySQL, SQLite
- **Tools:** GitHub, Figma, JIRA
- **Cloud:** AWS Deployment
- **Other:** Machine Learning, DL, AI

Experience

Junior R&D Engineer – SMACON Technologies

May 2025 – Aug 2025

- Assisted in software development and testing processes.
- Worked with team members to improve system performance.

Full Stack Development Trainee – DevTown

Dec 2021 – Apr 2022

- Learned full-stack development concepts and built mini projects.
- Gained hands-on experience in web technologies.

Additional Information

- Strong problem-solving and analytical skills
- Passion for continuous learning and development
- Strong understanding of software development lifecycle and best coding practices
- Ability to work effectively in team environments and adapt to new technologies quickly
- Good communication skills with experience in technical documentation and presentations
