PROFILE

Experienced Web Developer with passion for creating attractive and interactive websites meeting customer needs and exceeding expectations. Excels in HTML, CSS, JavaScript and Laravel development. Detail-oriented, organized and meticulous employee. Works at fast pace to meet tight deadlines. Enthusiastic team player ready to contribute to company success.

WEB DEVELOPER

EMPLOYMENT HISTORY

**Full stack developer AppSync
Designs, Kannur-branch of
appsynctechnologies.co.uk**

From 05/09/2024

- Enhanced website efficiency by optimizing back-end code and database queries.
- Reduced server downtime by implementing effective monitoring and maintenance strategies.
- Both backend and frontend development enhanced with the support of docker.
- Increased security of web applications by addressing potential vulnerabilities and integrating secure coding practices.
- Category Subcategory filters, Search products, invoice form creation and print the invoice with the support of ajax, pre fetching customer data.
- Developed scalable and maintainable API systems for smooth data exchange between front-end and back-end components.
- Improved application performance with caching techniques, resulting in faster load times for users.
- Integrated TLR Payment API into web application to enable secure and efficient online payment processing, using RESTful API standards and authentication protocols.

PROJECTS

1. specialistperformancecars.co.uk

Developed and deployed a high-performance automotive United Kingdom based Dynamic website *Specialist Performance Cars*, focused on selling high-end used vehicles. The project involved migrating from XAMPP to a Docker Sail-based Laravel environment as locally and deployed client side IONOS server, integrating APIs, and building a dynamic, mobile-responsive frontend with efficient data management and user interaction flows.

Key Responsibilities & Functionalities:

❖ Full Laravel Migration & Environment Setup:

- Migrated legacy project from XAMPP to Docker Sail using WSL-Ubuntu.
- Configured Laravel Sail containers for PHP, MySQL, and Nginx services.
- Deployed production build on VPS with cPanel then client side IONOS

❖ Dynamic Car Listings & Details:

- Built a **vehicle listing module** using Laravel Eloquent with pagination and filters in admin panel.
- Make, model, price-based filters, ajax based dynamic fetching of model when prior selecting of particular make.
- Implemented **dynamic car details page** fetching full specs via model relationships.
- Integrated **encrypted car IDs** in URLs for secure access to car detail Views

❖ Multi level Finance forms :

- Developed a **dynamic multi-step application form** in Laravel with proper data validation, session handling, and smooth step-to-step progression.
- Implemented **clean controller logic** to process and store multi-stage inputs into a unified model, ensuring data accuracy and consistency.

- Designed and optimized the **Finance model**, mapping 20+ fields including personal, address, and employment details.
- Developed a **user-friendly multi-step UI** using Blade templates, jQuery, and Bootstrap to improve user experience.
- Achieved a **40% reduction in form abandonment** by simplifying complex form structure into a step-by-step wizard.
- Conducted debugging, performance optimization, and UX improvements based on user testing.

❖ **API integration :**

- integrated GetAddress.io UK postcode lookup API to auto-populate address data, improving form usability and reducing manual input errors."
- Built a backend module for UK vehicle verification by integrating the DVLA Vehicle Enquiry API. The system sanitizes VRNs, sends authenticated HTTPS requests, handles API errors gracefully, and returns detailed vehicle metadata for auto-filling forms or validating listings in a car dealership application.

❖ **Well structured adminpanel dashbord :**

- Admin dashboard menus, database table stored car specifications fetched dynamically and showed table view, Integration of **Vehicle Registration Number Decode API** for UK based Vehicles.
- Admin can add new car, edit details, update information, delete unwanted rows etc.
- **Customized admin panel** developed for car dealer client with **Bulk Deletion** of rows, **Quick View** of entries as wish of admin by selection, **Dynamic Search** of entries with keyword identification, **Quick Edit** etc.
- Invoice creation, Edit, Update, Delete, Print Invoice.

2. [yameker.ae](#) E-Commerce Platform(Laravel, Docker Sail, MySQL, Telr Payment, EcoFreight API)

Developed **yameker.ae**, a full-stack e-commerce platform built with Laravel (PHP), MySQL, and modern front-end technologies. The site allows users to browse product categories, register/log in, add items to cart, place orders, and manage their account. On the admin side, I

implemented a dashboard for product management, order tracking, inventory control, and user management. Key features include secure authentication, role-based access (admin vs customer), payment gateway integration, responsive UI, and email notifications for order confirmations. The platform is designed for scalability, maintainability, and high performance.

Key Responsibilities & Features Developed:

- **E-commerce Architecture:** Built product catalogue, cart, wishlist, compare system using both user-based and session-based logic.
- **Advanced Dynamic Modals:** Implemented quick-add modal for product preview (price, size options, quantity, Add to Cart). Converted Add-to-Cart button dynamically to “Go to Cart” using AJAX.
- **Checkout & Order Flow:**
 - Developed multi-step checkout collecting billing & optional shipping addresses with toggle edit forms.
 - Stored orders with importance of ship to local/billing address.
 - Implemented separate save/update logic for billing and shipping without overwriting customer IDs.
- **Tlr Payment Gateway Integration:**
 - Implemented complete Tlr Hosted Payment workflow (initiate payment, confirmation, success/decline/cancel pages).
 - Stored transaction details and linked them with order IDs.
- **Shipment Management (Admin Panel):**
 - Integrated EcoFreight Merchant API for automatic shipment creation after admin approval.
 - Captured order reference, COD, shipper/consignee details, package dimensions & item data in structured JSON
- **Performance Optimization:**
 - Implemented lazy loading for images and reduced homepage render time.
 - Cleaned unused scripts, optimized database queries and improved performance.

- **Total Sales Section (NEW):**

- Built a sales analytics module showing total revenue, number of orders, payment status summaries, COD vs online payment split, and date-range based sales filtering.
- Generated Laravel-based reports for daily, weekly, monthly, and yearly sales.
- Added export options (CSV / Excel) for business reporting.
- Developed dynamic Builders section fetching and displaying content from database.
- Added shipment management dashboard allowing admins to create, track, and update shipments.

3. [Bedsaccom.co.uk](https://bedsaccom.co.uk) (Laravel, Docker Sail, MySQL, google reCAPTCHA)

BedsAccom is an accommodation/property-listing web platform developed to help users search, view, and enquire about rental properties using intelligent search filters and UK postcode/location lookup.

Key Responsibilities & Features Developed:

- **Database & Admin Panel**

- Designed database tables for properties, for each property listed by dynamic fetching of price, name, location, amenities, etc.
- Developed admin panel features:
 - Add/Edit/Delete properties
 - Upload/manage multiple images per property
 - Manage enquiries and booking requests
- Implemented secure form submissions with CSRF protection and validation.

- **Frontend Development**

- Built fully responsive pages for property listings, search results, and property detail views.
- Implemented dynamic UI components such as:
 - Interactive search filters (beds, price, location, postcode).
 - Modal-based information previews.

- Validation for postcode search and property enquiry forms.
- Implemented image loading optimizations (lazy loading, compressed images)
- Integrated **Google reCAPTCHA (v2/v3)** into enquiry and contact forms to prevent spam submissions and ensure secure user interactions.
- Configured reCAPTCHA site key & secret key in .env, implemented backend validation, and added frontend verification widget.

4. prestigeautovehicles.co.uk

Prestige Auto Vehicles is a vehicle listing and automotive sales website built to showcase premium used cars with detailed specifications, image galleries, and enquiry features.

Key Responsibilities & Features Developed:

❖ Admin Panel Enhancements:

- Developed features for:
 - Car listing and Car details.
 - Add/Edit/Delete vehicle listings.
 - Upload multiple car images.
 - Manage vehicle specifications.
- Implemented validation and proper upload directory handling.
- Intervention of image based compressing images without losing clarity.

❖ Frontend Development:

- Built responsive vehicle listing pages using Laravel Blade, CSS, and Bootstrap.
- Designed a modern car details page with:
 - Multiple car images
 - Car specifications (year, model, mileage, fuel type, engine, etc.)

Currently working Projects:

Resora International co : UAE based technical service project-trading,fabrication etc
Natural Floor Collection: Kerala, Kannur based floor specialization project.

Laravel Developer at SRV Infotech- Complete Software Solution For Business Development, Kannur.

02/2023-12/2023

- Enhanced user experience by implementing responsive web design and optimizing website performance.
- Streamlined website maintenance tasks for increased efficiency and improved site functionality.
- Developed custom web applications, resulting in tailored solutions for client needs.
- Increased website traffic through search engine optimization strategies and targeted content creation.
- Reduced load times and improved site speed by optimizing images, scripts, and other assets.
- Collaborated with cross-functional teams to deliver high-quality web products on time and within budget.
- Resolved technical issues promptly, ensuring minimal disruption to website performance and user satisfaction.
- **Projects:** 1)Dzyn.ae 2) unwind.in 3)kannurinternationalairport(teamwork)

BEHAVIORAL

Ability to work in team

Leadership quality.

Time management.

Good analytical skills.

Problem solving

capability. Decision making ability.

Creative thinking.

Highly organized.

Highly efficient.

Self motivated and highly Confident.

PHP Developer, Roosmart,Kannur,

Start up e-commerce company,

roosmart.in 2022 june -2023 february

- Worked closely with project managers to deliver high-quality end products within specified deadline.
- Integrated third-party APIs to enhance website functionality and provide additional services to users.
- Provided front-end development support, creating visually appealing designs that aligned with brand
