Monitor uptime, hosting, and databases to ensure site is performing at maximum capacity. Development expertise with custom post types, API integration, custom fields(ACF), plugins, customize the plugin and themes for high-traffic WordPress sites.

PROJECTS

EsupermarketOnline

E-Commerce Platform – PHP, MySQL, JavaScript

Online store/ e-commerce platform: The site displays products for sale across various categories and offers promotions and coupon deals. Cashback offers: The site mentions cashback rewards and membership benefits for customers registering on the platform.

DigitalShopGuru

E-Commerce Platform – Laravel Framework, MySQL, JavaScript

Digital Shop Guru is targeted to provide an independent online store for individual businesses who want to sell products of any kind day to day. Our objective is to bring the unorganised way of selling and displaying small scale business products to a well organised online platform where they can list their products online and broadcast it to their customers at ease. Our special motive is that these customers can hassle free send the interested products directly to the sellers WhatsApp account.

The customers can just look at all the seller products, choose the interested products and order on WhatsApp directly.
