DEVELOPERS

Developed reusable and modular code to improve efficiency, maintainability, and scalability.

Designed and implemented core functionalities and supporting tools, ensuring robust and reliable application performance.

OBJECTIVE

Experienced Software Developer with 8.6 years of hands-on experience in server-side web development, specializing in backend architecture and performance optimization. Proficient in designing scalable systems and leading company-wide integrations with various third-party APIs. Skilled in building secure, high-performance applications across multiple domains, including HR tools, e-commerce platforms, and marketplace automation.

Seeking an opportunity at Brash General to further enhance my expertise in database engineering, automation, and cloud-based solutions, while consistently delivering high-quality, reliable, and user-focused web applications.

WORK EXPERIENCE

Senior Software Developer, Indiafilms Pvt Ltd, Chennai

— Jan 2024 to Present

- **Enhanced software functionality** by identifying and resolving complex technical issues, ensuring optimal system performance.
- **Implemented automation solutions** to streamline repetitive tasks, reduce manual effort, and improve operational efficiency..
