 **LinkedIn:** [linkedin.com/in/jomit-jose](https://www.linkedin.com/in/jomit-jose)

PROFESSIONAL SUMMARY

A highly skilled Team Lead with 5+ years of experience, transitioning from a Laravel Developer to a backend expert and team leader. Started as a Laravel developer, mastering PHP, MySQL, and API development, and progressively expanded expertise into Node.js, Adonis.js, and scalable backend architectures. Adept at leading teams, building high-performance applications, and ensuring best coding practices. Passionate about innovation, agile methodologies, and DevOps implementation. Successfully led the development of 30+ applications and websites, delivering high-quality, scalable solutions across various domains.

WORK EXPERIENCE

Team Lead

Webandcrafts (WAC) | March 2025 - Present

- Designed and developed scalable and high-performance applications.
- Led a team of developers, conducted code reviews, and provided mentorship.
- Managed sprints, task delegation, and collaborated with stakeholders using Agile methodologies.
- Implemented CI/CD pipelines for efficient deployment.
- Ensured security best practices and optimized database performance.
- Led and successfully delivered over 30+ applications and websites.

Project Lead

Webandcrafts (WAC) | Jan 2022 - Nov 2023

- Defined project scope, timelines, and deliverables aligned with business goals.
- Led cross-functional teams, mentored members, and allocated resources efficiently.

- Engaged with clients, product managers, and executives to ensure seamless execution.
- Managed risk assessment and mitigation strategies.
- Conducted quality assurance and optimized workflows for on-time project delivery.
- Spearheaded the development of multiple large-scale applications.

Laravel Developer

Webandcrafts (WAC) | Jan 2020 - Dec 2021

- Developed and maintained scalable web applications using Laravel and PHP.
- Optimized MySQL/PostgreSQL databases for better performance.
- Built RESTful APIs and integrated third-party services securely.
- Implemented authentication (JWT, OAuth) and enhanced application security.
- Managed deployments using CI/CD pipelines on AWS/GCP.

Full Stack Developer Intern

Right Soft Options Institute

- Learned and applied PHP, Laravel, JavaScript, jQuery, Bootstrap, and CodeIgniter.
- Worked on database-driven applications using MySQL.

EDUCATION

🎓 BSc. Computer Science (2019) - MG University | Percentage: 70%

🎓 HSC (2016) | Percentage: 80%

🎓 SSLC (2014) - CBSE | CGPA: 80%

TECHNICAL SKILLS

- **Backend Frameworks:** Node.js, Adonis.js, Nest.js, Laravel, PHP
- **Databases:** MySQL, PostgreSQL, MongoDB

- **Version Control:** GitHub, GitLab
 - **DevOps & CI/CD:** Docker, AWS, GCP, Jenkins
 - **API Development:** RESTful APIs, GraphQL
 - **Security:** JWT, OAuth, Encryption, SSL
-

PROJECTS

IKEA SSO Login

- **Technologies Used:** Laravel, MySQL, Laravel Blade Engine (Backend Admin Panel), REST API
- **Description:** Developed an SSO login system using IKEA's IRW and CRM systems, allowing users to access multiple IKEA applications such as SFM and IKEA Store applications seamlessly.
- **Key Contributions:** Designed and developed the backend authentication system, ensuring smooth integration with IKEA's existing infrastructure.

Holitoor - Tourism Booking Application

- **Technologies Used:** Laravel, Vue.js, MySQL
- **Description:** Developed a tourism booking and scheduling platform that allowed users to plan tours, set pricing for different age groups, and manage bookings.
- **Key Contributions:** Designed and implemented the backend logic, managed database structuring, and developed REST APIs for seamless frontend-backend communication.

Logos Learning - Online Learning Platform

- **Technologies Used:** Adonis.js, MongoDB, AWS Lambda, React.js
- **Description:** Built a learning management system where students and teachers could register, schedule, and book classes. Integrated AWS Lambda to automate class initiation and termination based on scheduled timings.
- **Key Contributions:** Led the project as Project Lead with two developers under my management, designed backend architecture, implemented automated scheduling, and optimized database performance.

Nest Matrimony

- **Technologies Used:** Laravel, MySQL, Flutter, React.Js
- **Description:** Developed a large-scale matrimonial application with over 400,000 profiles, supporting both mobile and web applications. The system featured profile management, matchmaking, and premium memberships.
- **Key Contributions:** Led the project as Project Lead, managing multiple developers, optimizing APIs for large-scale data processing, and ensuring efficient database performance and scalability.

BAPPL Loyalty App

- **Technologies Used:** Adonis.js, MongoDB, Flutter, React.js
- **Description:** Developed a vendor loyalty and coupon redemption application for users to collect and redeem loyalty points. The application supported mobile and web-based platforms.
- **Key Contributions:** Led the project as Team Lead, overseeing two developers, designing optimized APIs, and ensuring seamless frontend-backend communication for high-performance transactions.

CERTIFICATIONS & ACHIEVEMENTS

- ✓ Participated in Google Cloud Dev Fest 2024
- ✓ Volunteered WAC events and recruitment drives
- ✓ Coordinated and organized induction programs for freshers
