Frontend Developer | WordPress & Shopify Specialist | MATLAB Developer

Frontend Developer and Web Technology Engineer with a strong foundation in Electronics and Communication Engineering.

Experienced in developing and maintaining WordPress and Shopify websites. Proficient in frontend technologies, including

HTML, CSS, and basic PHP debugging, with extensive experience in building, customizing, and maintaining live websites.

Skilled in managing end-to-end website operations, optimizing performance, and delivering user-friendly solutions that

enhance the overall user experience. Also experienced in IoT systems and MATLAB-based simulations, bringing a versatile

technical skill set.

Willing to relocate to: Kochi, Kerala - Bangalore City, Bengaluru, Karnataka - Thiruvananthapuram, Kerala

Personal Details

Eligible to work in: India

Highest Career Level: 1-2 years experience

Industry: Information Design & Documentation, Mathematics, Project Management

Total years of experience: 1

Work Experience

Web tech engineer

Levelx Micro Systems-India

Full-time

0-15 days notice period

October 2025 to Present

Designed and maintained websites using WordPress and Shopify platforms

- Troubleshoot and resolved issues in PHP-based websites and web applications, ensuring optimal performance and

stability.

- Customized themes and templates based on specific business requirements
- Built and modified web pages using Elementor and similar page builders
- Managed front-end development using HTML, CSS, and responsive design principles
- Performed basic PHP debugging and resolved website functionality issues
- Handled website operations including content updates, product uploads, and page management
- Ensured cross-browser compatibility and full mobile responsiveness

- Maintained and updated WordPress websites, including pages, themes, plugins, and overall site functionality.
- Customized website layouts and functionality using WordPress page builders, custom CSS/JavaScript, and theme templates.
- Ensured website security, regular backups, and solved technical issues, bugs, and compatibility problems.
- Managed hosting environments, domains, and integrations such as analytics, contact forms, and third-party tools.
- Performed comprehensive testing, debugging, and documentation to ensure long-term system reliability and maintainability

MATLAB Software Developer

Chemapol Industries-Bengaluru, Karnataka

Full-time

November 2024 to September 2025

Developed MATLAB-based simulation models for system analysis, optimization, and performance evaluation

- Executed data validation and processing to improve accuracy and reliability of computational outputs
- Applied mathematical modeling and numerical computation techniques for system simulations
- Conducted testing, debugging, and troubleshooting of simulation models
- Collaborated with cross-functional teams to refine processes and improve workflow efficiency
- Documented technical processes and simulation results for internal reference

Education

Electronics and Communication (B.Tech/B.E.)

Mangalam College of Engineering-Kottayam, Kerala

Full-time | July 2020 to June 2024

Scored: 7

Higher Secondary School

Thadicadu HSS & VHSS-Kollam

June 2017 to May 2019
