- Specialized in **Magento, osCommerce, and ZenCart**, handling **custom development and performance tuning**.
- Integrated **payment gateways**, third-party APIs, and **system enhancements**.

Key Projects

Cloud Rental Manager

[Website](#) | Role: Team Lead

The product is a **Property Management System** designed to streamline rental operations. It facilitates online lease agreements between landlords and tenants through embedded document signing. The platform supports multiple access levels, including **Property Manager, Landlord, Tenant, Admin, and Super Admin**, each with role-specific features and permissions.

End User Base:

The end users include **tenants and landlords of residential/commercial properties**, as well as **property managers** responsible for overseeing multiple listings and rental agreements.

Tech Stack: MERN stack, Dropbox Sign API

Homescapex Online

[Website](#) | Role: Lead Backend Developer

Homescapex Online is a **multi-regional eCommerce platform** developed using **Magento 2**, catering to customers in the **United Kingdom, Germany, and France**. The platform supports multilingual and multi-currency features to provide localized experiences. A **custom Laravel-based internal CRM** is used by the company's staff to manage and sync **orders, products, and customer data** from the eCommerce frontend to the backend system.

End User Base:

- **Retail customers** across Europe who shop via the Magento-based storefront
- **Internal company staff**, including **sales, admin, and support teams**, who use the Laravel CRM for order processing, product management, and customer service

Tech Stack: Magento 2 (eCommerce), Laravel (Internal CRM)

Xynage

Role: Lead Backend Developer

Xynage is a **digital signage and ad campaign management platform** used by major brands like **McDonald's and Taco Bell** to run time-based promotional campaigns. The system allows vendors to schedule and manage advertisements for specific time slots and locations. Campaigns are distributed across multiple digital platforms including **mobile apps** and **websites**, ensuring high visibility and reach.

End User Base:

- **Corporate clients and vendors** (e.g., McDonald's, Taco Bell) who schedule and manage advertising campaigns
- **General consumers** who view these ads on **mobile devices** and **web platforms**

Tech Stack: Xibo CMS, PHP, JavaScript, React Native, Swift

NoBs Marketplace

[Website](#) | **Role:** Lead Backend Developer

Technologies: Laravel, Postman, MySQL

- Designed and implemented **secure user management and access control**.
- Developed **REST APIs for platform integration** and improved performance.

Syngenta Playbook

Role: Backend Developer

Technologies: Pimcore, Symfony, Git

- Customized **admin panel with multi-user access levels**.

- Integrated **automated workflows using Symfony framework**.

Smart Parcel Box

[Website](#) | **Role:** Magento 2 Developer

Technologies: Magento2, Git, PHP

- Implemented **multi-language pricing models and CMS block customization**.
- Regular **client communication for project updates** and system enhancements.

PMS (Project Management System)

Role: Full Stack Developer

Technologies: Laravel, ReactJS, GraphQL

- Developed **GraphQL APIs** for real-time task management.
- Built an intuitive **task and subtask management system** in **ReactJS**.

Punjab Urban Planning & Development Authority (PUDA)

Role: Team Lead

Technologies: CakePHP, JQuery, Git

- Implemented forms to fill residential property details in backend.
- Worked on admin roles and access in backend.
