"I feel that my greatest strengths are firstly my strong commitment to providing a professional service to all colleagues with whom I work. Secondly my skill at developing and maintaining a close working relationship with every company client, something which in turn helps me to gain an in-depth understanding of their individual needs. Thirdly my real passion for Coding and Designing as a whole, an obsession which allows me to spot trends and develop best practice processes."

Jerry Jones

Jerry Jones
Sr. Backend Developer - PHP

Professional Summary

A highly accomplished and results-oriented Senior Backend Developer with over two decades of comprehensive IT experience, including 15 years dedicated to backend systems architecture and development across diverse database platforms. Possesses a proven ability to design, develop, and implement innovative, logical solutions for complex technical challenges, consistently delivering high-quality web applications. Expertise spans core PHP, modern frameworks (Laravel, CodeIgniter), multiple database systems (MySQL, PostgreSQL), API development (REST, JWT), and cloud platforms (AWS, Google Cloud). A meticulous and strategic thinker with a passion for technology, user experience, and adhering to international web standards and best practices. Seeking a challenging senior role within a forward-thinking organisation that values exceptional technical proficiency and offers opportunities to contribute to significant projects.
