OBJECTIVE

Software Developer with 4 years of experience in the IT industry, specializing in PHP, Laravel, MySQL, and AWS. Proven ability to design, develop, and maintain scalable web applications with a focus on performance and security.

PROFESSIONAL SUMMARY

- IT professional with 4 years of experience in software development.
- Skilled in developing, maintaining, and testing web-based applications.
- Experienced in customizing applications based on client requirements and providing technical support.
- Strong understanding of MVC architecture and modern web development practices.

EDUCATION

Viswajyothi College Of Engineering and Technology, M G University

B.Tech – Computer Science and Engineering

PROFESSIONAL EXPERIENCE

I. Metavio.ai Pvt Ltd, Kochi – *Software Developer*

[Mar 2022 – Mar 2026]

Project #1: Recognition of Prior Learning (RPL)

Client: Institute of Health & Management (IHM) and Institute of Health and Nursing Australia (IHNA)

Environment: HTML5, Bootstrap CSS, jQuery, AJAX, PHP 7.3, MySQL 5.7, Laravel 8.8, Apache Server

Team Size: 3

Project Links:

<https://acerpl.com.au/login>

<https://www.lportfolio.com.au/>

LPortfolio (Life Long Learning Portfolio) for Students:

Developed a student portfolio system enabling users to upload academic documents (Knowledge Evidence, Work Evidence, Additional Notes), view assessor feedback, use online quizzes with result tracking, apply for course units, and receive notifications. Implemented a workflow-based status tracking system for course applications and assessments.

Acerpl.com for Administrative Users:

Developed and maintained the Acerpl.com admin portal for managing student RPL assessments and course workflows for IHM and IHNA. Includes modules for users, courses, quizzes, approval levels, dashboards, assessment evaluation, meeting scheduling, video uploads, report generation, email notifications, and full RPL status workflow (Accept, Reject, Gap Training, Partial Training).

Key Responsibilities / Contributions

- Handled backend development using Laravel, including **API creation, database design**, and business logic implementation. Also contributed to frontend components using **Bootstrap and jQuery**.
- Designed and developed **web forms for data entry** and user interaction.
- Implemented **file upload functionality with progress bar** for document submissions.
- **Integrated API calls** for data communication between application modules.

- Implemented **email notification system** to send alerts and updates to users.
- Developed a comment feature for **educators and students** to provide feedback.
- Implemented **data storage solutions using AWS services**.

Project #2: Learning Management System (LMS)

Client: Institute of Health & Management (IHM) and Institute of Health and Nursing Australia (IHNA)

Environment: PHP 7.3, MySQL 5.6, Laravel 8.83, Apache Server

Frontend: React JS

Backend: PHP Laravel

Team Size: 3

Project Links:

<https://lms.edusystems.com.au/>

Developed a Learning Management System to manage student learning and course enrolment with separate login access for learners and administrators. Implemented core modules including Courses, Question Bank, Users, and Asset Libraries.

Key Responsibilities:

- Handled backend development using Laravel, including **API creation, database design, and business logic implementation**.
- Developed and maintained the **LMS for student course enrolment and learning activities**.
- Implemented separate login types for **students and admin users with role-based access**.
- Developed functionality for admin users to **create courses and enrolls students**.
- Designed and implemented modules including **Courses, Question Bank, Users, and Asset Libraries**.
- Conducted **QA testing and debugging** to identify and resolve application issues.
- Implemented **algorithms and business logic** based on application requirements.
- Designed and **implemented API authentication** using token generation mechanisms.
- Defined **API request and response structures** for efficient data handling and integration.
- Implemented **data storage solutions using AWS services**.

Project #3: Credit Transfer System (CT)

Client: Institute of Health & Management (IHM) and Institute of Health and Nursing Australia (IHNA)

Environment: PHP, MySQL 5.6, Laravel 8.83, Apache Server

Frontend: React JS

Backend: PHP Laravel

Team Size: 5

Project Links:

<https://ihm.acerpl.com.au/signin>

<http://ihna.acerpl.com.au/>

Developed a Credit Transfer System within the IHM Acerpl platform to manage student CT requests based on prior academic qualifications. Implemented features for document uploads (certificates, AEI documents, course materials), automated credit transfer score calculation, and workflow management for CT items and course unit mapping with seamless integration into the Knowledge Hub (KH) system.

Key Responsibilities:

- Handled backend development using **Laravel, including API creation, database design, and business logic implementation**.
- Developed and maintained Acerpl Management System APIs for **student course submission**.
- Designed and implemented backend **database structures using MySQL and Oracle**.
- Implemented API security using **token-based authentication mechanisms**.
- Implemented **algorithms and business logic based on application requirements**.
- Implemented **role-based authentication system** with separate login access for different user roles.
- Developed functionality for admin users to create and **manage courses and course units**.

- Designed modules including **User Management, IHM Course Management, Role Management, and IHM Approved System.**
- Conducted **QA testing, debugging, and database support** for issue resolution.
- Managed notification systems using **Laravel queues and jobs** for background processing.
- Implemented **data storage solutions using AWS services.**

SKILLS

Web & Scripting

- Languages: PHP, MySQL Script, jQuery Script, AJAX, Python
- Web Tools: HTML5, Bootstrap CSS
- Frameworks: Laravel 8.83, Yii 1.8, Zend 2, FastAPI

Databases

- MySQL, PostgreSQL

Tools & Platforms

- Git, Bitbucket, VS Code
- Apache Server, XAMPP Server, WAMP Server
- FileZilla (Live Server on Windows Platform)
- Operating System: Windows 10 Pro
