PROFILE

Results-driven Full Stack Developer with 2 years of experience in designing and developing dynamic, database-driven web applications. Holds a BCA degree from Sharda University and has strong expertise in Core PHP, SQL, and REST API integration. Skilled in delivering static, dynamic, and eCommerce websites with a focus on performance, security, and user experience.

WORK EXPERIENCE

Web Intermesh Pvt. Ltd.

2024 AUGUST - PRESENT

Senior Backend Developer

- Designed, developed, and maintained complete backend architecture for dynamic, eCommerce, and portal-based web applications using Core PHP, SQL, and REST APIs.
- Managed and optimized CRM systems and business portals, including database design, complex SQL functions, and performance improvements.
- Built multiple in-house software solutions such as Employee Chat System, CRM Software, Accounting Software, GST Management System, and Work Tracking System with secure API integration.
- Developed scalable modules for user management, role-based access, data sharing, reporting, and automated calculations (GST, billing, tracking).
- Collaborated with frontend teams to deliver secure, efficient, and high-performing applications aligned with business requirements.

Tradologie

Jan 2024 - Aug 2024

Web Developer

- Developed and maintained static and eCommerce websites using HTML, CSS, JavaScript, ensuring responsive design and cross-browser compatibility.
- Implemented dynamic UI components, optimized page performance, and integrated third-party tools to enhance user experience and functionality.

PROJECTS

- Developed 200+ static, dynamic, and eCommerce websites using HTML, CSS, JavaScript, PHP, SQL, and REST API integration.
- Designed and implemented multiple in-house software solutions including CRM, Accounting, GST, Work Tracking, and Employee Chatter systems.
- Handled complete backend development, database architecture, API integration, and frontend coordination for scalable business applications.
