About Me

I am a full stack php developer with 13+ years of experience in web development. I am currently working as a PHP Architect at Dineplan. Being a fullstack developer I can work on both frontend and backend, but my strongest area is backend development using PHP. On the backend side I am good at php and mysql. I have worked on php frameworks like Laravel, Codeigniter, symfony etc. On the frontend side I am good at css and javascript using jquery.

I had worked on vtiger crm a lot and given service to many companies around the world. I am also good at linux server administration and have worked on cloud platforms like AWS,google cloud, digital ocean etc.
