PROFESSIONAL SUMMARY

- **IT Professional:** 11+ years of expertise in PHP, Python development and technical leadership.
- **Technical Specialist:** Proven track record in designing, developing, and optimizing complex web solutions.
- **Project Leadership:** Experienced in leading projects from inception through deployment, ensuring alignment with business objectives.
- **System Performance:** Demonstrated ability to enhance system performance and implement best practices in coding and architecture.
- **Team Collaboration:** Adept at fostering collaborative team environments and mentoring junior developers.
- **Innovation & Efficiency:** Skilled in driving innovation and improving efficiency within development teams.
- **Agile Methodologies:** Proficient in Agile and Scrum methodologies, ensuring iterative development and continuous improvement.
- **Client Interaction:** Skilled in engaging with clients to gather requirements, provide technical guidance, and ensure deliverables meet client expectations.

SKILLS

- | | |
|---|---|
| <ul style="list-style-type: none">● Languages: PHP, Python● Operating Systems: Windows, Linux, Ubuntu● Databases: MySQL, PostgreSQL● Frameworks: CodeIgniter (PHP), Laravel (PHP), FastAPI (Python)● LMS: Moodle● Web Editor: Visual Studio● Front End Technologies: HTML, CSS, Javascript | <ul style="list-style-type: none">● Cloud Environment: AWS● Web Server: Apache● Continuous Integration Tool: Jenkins● Version Control Tool: GIT● Containerization Tool: Docker● LAMP Stack (Linux, Apache, MySQL, PHP) |

WORK HISTORY

Lead Software Developer, 07/2025 to 01/2026

BioQuest Solutions PVT LTD – Bangalore.

- Leading the architecture design for this project, focusing on scalability and modularity.
- Serving as the lead architect for this project, I oversee the overall technical design and ensure alignment with the project goals.
- Lead the development and implementation of scalable web applications using PHP and related technologies.
- **Designed and implemented RESTful APIs** using Core PHP and MVC, enabling seamless integration with third-party services and improving data accessibility for front-end applications.

- **Leveraged AWS services** (e.g., EC2, S3, RDS) to build a robust and scalable cloud infrastructure for the application, improving performance, security, and reliability.
- Architect and optimize application frameworks, ensuring high performance and security.
- Collaborate with cross-functional teams to define project requirements and deliver solutions aligned with business goals.
- Followed Agile development methodologies, attending sprint meetings and contributing to project planning and progress tracking.
- Architecture designed to support **future migration from PHP to Python-based services**.

Sr.Technical Specialist, 01/2023 to 07/2025

Efficienza Business Solutions PVT LTD – Chennai.

- Leading the architecture design for this project, focusing on scalability and modularity.
- Serving as the lead architect for this project, I oversee the overall technical design and ensure alignment with the project goals.
- Lead the development and implementation of scalable web applications using PHP and related technologies.
- **Developed and deployed a web application** using **CodeIgniter** framework, ensuring scalable and maintainable architecture while adhering to best development practices.
- **Designed and implemented RESTful APIs** using CodeIgniter, enabling seamless integration with third-party services and improving data accessibility for front-end applications.
- **Leveraged AWS services** (e.g., EC2, S3, RDS) to build a robust and scalable cloud infrastructure for the application, improving performance, security, and reliability.
- **Implemented security best practices**, utilizing AWS IAM for access control, encrypted S3 buckets for data storage, and secure EC2 instances.
- Architect and optimize application frameworks, ensuring high performance and security.
- Collaborate with cross-functional teams to define project requirements and deliver solutions aligned with business goals.
- Mentor and guide junior developers, conducting code reviews and providing constructive feedback.
- Oversee deployment processes and maintain continuous integration/continuous deployment (CI/CD) pipelines.
- Followed Agile development methodologies, attending sprint meetings and contributing to project planning and progress tracking.

Senior Software Engineer, 08/2021 to 12/2022

GMMCO LTD – Chennai.

- **Led the architecture and implementation** of an internal Learning Management System (LMS) developed using Moodle, enabling seamless online learning and training for internal teams.
- **Designed and customized the Moodle platform** to meet specific business requirements, improving internal training processes and employee engagement.
- **Provided technical support and training** to internal users, ensuring smooth adoption of the system and maximizing engagement with the LMS.

- **Created and maintained documentation** for system architecture, Moodle customization, and user training, enabling easy handover and future updates.
- **Monitored and evaluated system performance**, identifying and resolving issues related to uptime, course delivery, and user experience.

Senior Software Engineer, 03/2016 to 08/2021

Naethra Technologies PVT LTD – Chennai.

- Developed and maintained web applications using PHP, ensuring seamless integration with FileMaker databases to manage and retrieve data efficiently.
- Managed off-premises data storage solutions, ensuring data integrity, security, and accessibility across remote locations.
- Created and maintained APIs and data connectors to enable smooth interaction between PHP applications and FileMaker databases.
- Using File Transfer Protocol to deploy code on server.

Software Engineer, 03/2014 to 09/2015

ImaxB Solutions – Chennai.

- Assisted in the development and maintenance of web applications using PHP, contributing to both front-end and back-end coding tasks.
- Developed and maintained SQL queries for database interactions, ensuring efficient data retrieval and manipulation.
- Supported the integration of third-party APIs and services to extend application capabilities and enhance user experience.

EDUCATION

Bachelor of Engineering: Computer Science & Engineering, 2013, **SCAD College of Engineering Technology** - Tirunelveli.

- Graduated with 6.2 CGPA

ACCOMPLISHMENTS

Project: Eptral

Technologies Used: PHP (Custom MVC), MySQL PDO, REST API, AWS (EC2, RDS, S3), Angular (Frontend handled separately).

Description:

EPTRAL is a healthcare-focused Learning & Training Management platform used by hospitals. Each hospital functions as a separate client with Super Admin, Admin, Manager, and Participant roles. The system enables digital course management, assessments, question banks, and scoring.

Roles & Responsibilities:

- Designed backend using custom PHP MVC with PDO.
- Built REST APIs for Angular frontend.
- Implemented RBAC for multiple user roles.
- Developed assessment engine with scoring logic.
- Designed optimized MySQL schema.
- Hosted backend on AWS EC2, DB on RDS.

- Implemented secure authentication and API protections.
- Worked closely with Angular team for integration.

Project: ITIGO

Technologies Used: LAMP Stack (**Linux, Apache, MySQL, PHP**), HTML/CSS, JavaScript, Ajax, AWS, Docker, Jenkins.

Description:

ITIGO is a web-based application designed for interpreting services across multiple languages based on client requirements. The platform supports multiple user roles to capture and manage assignments created within ITIGO. The backend is developed using the CodeIgniter framework, while the frontend is built using HTML and Bootstrap. The application integrates third-party services such as QuickBooks, 1Password Secret Manager, and Google APIs.

Roles and Responsibilities:

- **Architecting Solutions:** Led the design and architecture of the ITILive.com platform, ensuring scalability, security, and high performance. Developed robust backend systems using PHP and managed complex data interactions.
- **Technical Leadership:** Oversaw the development team by providing guidance and mentorship. Conducted code reviews, enforced coding standards, and ensured best practices were followed throughout the development lifecycle.
- **Database Management:** Designed and optimized MySQL database schemas to support data-intensive requirements. Implemented advanced querying and indexing strategies to enhance data retrieval and storage efficiency.
- **API Integration:** Managed the integration of third-party APIs and services, ensuring seamless connectivity and data exchange between ITILive.com and external systems. Oversaw the development of RESTful APIs to extend platform capabilities.
- **Performance Optimization:** Conducted performance tuning of both application and database layers. Implemented caching mechanisms and load-balancing strategies to handle high traffic volumes and ensure optimal system responsiveness.
- **Deployment & Maintenance:** Directed deployment activities, including environment setup and CI/CD pipeline management. Ensured smooth releases, updates, and ongoing maintenance with minimal disruption to users.

Project: GLMS

Technologies Used: Moodle, MySQL

Description:

GLMS is a web-based application developed for GMMCO to support internal employee learning and training initiatives.

Roles and Responsibilities:

- Involved in requirement analysis, design discussions, and code reviews.
- Developed application modules as per defined business and technical requirements.
- **Architecting Solutions:** Designed and structured the architecture of the GLMS platform to meet the learning and development needs of GMMCO employees. Ensured a modular design to support easy feature enhancements and long-term maintenance. Focused on optimizing performance for concurrent users, implementing secure access controls, and integrating Moodle as the core LMS framework. Led backend development using PHP to manage dynamic content delivery, user roles, and training data tracking.

Project: STC Operations

Technologies Used: LAMP Stack (Linux, Apache, MySQL, PHP), CodeIgniter, HTML, CSS, AJAX

Description:

This project was developed to manage repair and shipping operations. Administrators create repair details using STC operations and share them with clients. Client communication is handled through the STC POPortal, where issues are reviewed, resolved, and feedback is sent back to the administrator. The system generates reports and sends notifications via email and messaging services.

Roles and Responsibilities:

- Involved in requirement analysis, design discussions, and code reviews.
- Developed application features as per business requirements.
- Used **PHPExcel** and **PHPWord** to generate reports in MS Excel and Word formats, and **mPDF** to generate PDF reports.
- Integrated and consumed third-party web services such as **Twilio** for messaging and notification processing.
- **Architecting Solutions:** Designed and developed a secure, scalable STC & POPortal platform using the LAMP stack and CodeIgniter. Implemented modular components for repair tracking, client communication, and feedback management to streamline operations.
