

LAKSHYA VARSHNEY

Full Stack Developer | 3.5+ Years of Experience

Aligarh, India • +91-7454951789 • varshney.lakshya05@gmail.com • [GitHub](#) • [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3.5+ years of experience architecting and shipping scalable web applications across ERP, real estate, and HRMS domains. Proficient in PHP (Laravel, Yii2), JavaScript (React.js, Vue.js), and cloud services (AWS). Demonstrated impact through 30%+ performance improvements, database optimization, and end-to-end system design. Experienced in leading teams, building APIs from scratch, and delivering production-grade solutions in agile environments.

TECHNICAL SKILLS

Languages: PHP (Advanced), JavaScript (ES6+), Python (Beginner), Java (Intermediate), HTML5, CSS3

Frameworks & Libraries: Laravel, Yii2, React.js, Vue.js, Node.js, Strapi

Databases: MySQL, PostgreSQL | **Cloud & Tools:** AWS (S3, SES), Google Cloud Console APIs, Git, GitHub, GitLab

Other: REST APIs, System Design, ERP Development, IoT (Arduino, NodeMCU, Raspberry Pi), Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer — Accrete Globus Technology, Gurugram

Sep 2025 – Present

ERP Software Development

- **Situation:** Joined to build a full-fledged ERP system from scratch; architected the entire backend and frontend, defining data models, module boundaries, and scalable API contracts from day one.
- **Task:** Developed and maintained external APIs to increase data extraction efficiency across two ERP projects, targeting enhanced system interoperability and supply chain integration.
- **Action:** Built an API Playground module enabling seamless integration of the ERP system with local supply chain projects; optimized database schema reducing redundancy and improving data consistency by 20%.
- **Result:** Enhanced the second ERP project by 30% overall, with measurable gains in data extraction speed, reduced redundancy, and improved reliability of cross-system data flows.
- Designed low-level system architecture for ERP modules, applied best practices for scalability, and documented system design for onboarding and future development.

Full Stack Developer — HandySolver IT & Services, Gurugram

Dec 2022 – Sep 2025

Backend APIs, Delivery Platform, Lead Generation

- Architected and implemented scalable backend for Farzin real estate lead generation platform; optimized relational DB schema improving query performance by 30%.
- Integrated LinkedIn and Twitter APIs for automated campaign delivery; leveraged AWS S3 and SES for file storage and transactional email at scale.
- Integrated Google Cloud Console APIs for dynamic document creation and in-system file uploads, eliminating manual workflows across teams.
- Led system design discussions for internal tools and mentored junior developers, enforcing code review standards for maintainability.

Full Stack Developer Intern — ColoredCow IT Services, Gurugram

Jun 2022 – Oct 2022

React.js, Strapi, Laravel, Vue.js

- Contributed to Employee Portal, an open-source HRMS built on Laravel and Vue.js; built CRUD modules, role management, and attendance system.
- Deployed AWS S3 and Nodemailer for media management and communication; delivered production-ready features through agile collaboration with clients.

EDUCATION

B.Tech in Computer Engineering — GLA University, Mathura

2018 – 2022 | CGPA: 7.47

CERTIFICATIONS & PROJECTS

Certifications: ColoredCow Internship • Digital Skills: AI (FutureLearn) • Intro to IoT (Udemy) • AI from Data Center to Edge (Intel)

Key Project: Employee Portal (Open-source HRMS) — Laravel, Vue.js, MySQL — CRUD modules, role management, attendance automation.
