Laravel Developer with 7+ years of experience building scalable and secure web applications using PHP, Laravel, MySQL, and Vue.js. Skilled in REST API development, authentication systems, backend architecture, and third-party integrations. Experienced in delivering production-ready solutions for real estate, banking, and enterprise platforms.

SKILLS

Backend: PHP, Laravel, CodeIgniter, REST API Development

Frontend: Vue.js, JavaScript, HTML5, CSS3, Bootstrap

Database: MySQL

Tools & Platforms: Visual Studio Code, Postman, Putty, Laravel Forge, Git

Laravel Expertise: REST APIs, Authentication & Authorization, Queue Jobs, Cron Scheduling, File Processing, Third-Party API Integration, Performance Optimization

WORK EXPERIENCE

EMLAK BULUCU PORTAL LLC – Akarat.com, Dubai,UAE - PHP Laravel Developer

February 2025 - Present

- Contributed to the development of a Laravel-based real estate platform by implementing CRUD modules and multi-role authentication with OTP verification.
- Enhanced the property filtering system with refined search conditions, improving listing accuracy and helping users discover relevant properties faster.
- Developed REST APIs for mobile application integration and implemented automated email alerts for new property listings based on user filters.
- Integrated Dubai Land Department (DLD) property services to synchronize property data with the platform.
- Developed a bulk property import workflow where XML data is converted to Excel and processed using Laravel queue jobs, automatically creating agents before inserting property records.
- Tech Stack:** Laravel, MySQL, REST APIs, Queue Jobs, Cron

DecaSync Innovations Pvt Ltd, Kochi, India - Senior Software Engineer

November 2024 - February 2025

- Enhanced the Job Tracking Management System by improving task tracking and automating job assignments.
- Streamlined maintenance workflows for supervisors and technicians through improved system processes.
- Implemented labor cost calculations and efficiency reporting, providing better operational insights for stakeholders.
- Tech Stack:** Laravel, React

ALT-D Technologies LLP, Kochi, India - Software Engineer

June 2020 - March 2024

- Developed a tuition management system with multi-role authentication, enabling student registration by batch/class and academic performance tracking.
- Built a banking application for managing news, circulars, galleries, and automated expense claims with PDF generation.
- Developed an employee mental health platform with bulk user upload, survey assessments, graphical reports, and appointment scheduling.
- Implemented secure coding practices including input validation, encryption, and secure routing in Laravel and Vue.js applications, ensuring protection against common web vulnerabilities.
- Led end-to-end development including requirement analysis, documentation, deployment, and integrations with Mailchimp, Calendly, and Vimeo.
- **Tech Stack:** Laravel, Vue.js, MySQL, JavaScript, Bootstrap

Logidots Technologies, Trivandrum, India - Application Developer

May 2019 - March 2020

- Redesigned and optimized a courier management system with enhanced security and improved operational workflows.
- Implemented zone-based package management for efficient package allocation and tracking.
- Developed role-based access control (RBAC) for multiple system levels including Super Admin, Hub Admin, and Users.
- Built a barcode generation feature containing courier and package details to improve package identification and tracking.
- **Tech Stack:** Laravel, Vue.js, HTML, CSS, Bootstrap, MySQL, JavaScript.

Kawika Technologies Pvt Ltd., Trivandrum, India - Jr.PHP Developer

July 2018 - January 2019

- Developed and integrated REST APIs using Laravel for seamless data exchange between systems.
- Participated in Agile development cycles, collaborating with cross-functional teams to deliver iterative improvements.
- Created technical documentation for APIs, system architecture, and development workflows.

Codegreen Technologies LLP, Kochi, India - PHP Developer

February 2017 - June 2018

- Led development of dynamic websites with admin dashboards and backend management systems.
- Built responsive, cross-browser compatible applications optimized for performance and accessibility.
- Conducted performance testing and optimization, achieving 25% faster loading times and reducing website bounce rates by 20%.
