Target Roles: Development Team Lead | Senior Software Engineer

Total Experience: 13+ Years

Professional Summary

Seasoned Development Team Lead and Senior Software Engineer with over 13 years of experience designing, developing, and delivering robust, scalable web applications. Proven expertise across diverse domains including Logistics, HR, Tourism, Event Management, Insurance, and Waste Management. Specialized in PHP, Laravel, MySQL, PostgreSQL, MongoDB, Node.js, Python, AWS, and Linux environments. Demonstrated success in leading cross-functional teams (5–10 developers), managing full software development lifecycle (SDLC), and implementing modern DevOps, CI/CD, and Agile practices. Known for combining deep technical knowledge with strategic project leadership to drive quality, performance, and client satisfaction.

Key Achievements

- Successfully delivered over 10 enterprise-grade web applications across sectors such as Logistics, HR, Event Management, Insurance, Waste Management and Tourism.

Ensured on-time releases with minimal post-deployment issues through strong planning and coordination.

- Migrated multiple legacy systems to modern Laravel architecture.

Reduced technical debt, improved maintainability, and ensured seamless scalability.

Integrated legacy platforms using Laravel APIs and implemented real-time data sync via Salesforce webhooks.

Developed responsive and dynamic frontends using Vue.js to enhance user experience.

- Mentored and guided junior developers within cross-functional teams (5–10 members).

Introduced and enforced coding standards that improved code quality and reduced bugs by 30%.

- Played a pivotal role in client communication and sprint planning.

Ensured smooth project execution through efficient task breakdown, estimation, and cross-team collaboration.

- Architected and implemented high-performance backend solutions for logistics systems.

Streamlined business processes and improved operational efficiency by over 30%.
