8075515520

Results-driven Software Developer with 3+ years of experience designing and maintaining web applications, RESTful APIs, and low-code platforms. Proficient in PHP, Laravel, Vue.js, and MySQL with a proven track record of streamlining workflows and delivering scalable solutions in healthcare and education domains. Strong communicator who collaborates effectively with cross-functional stakeholders to translate requirements into robust software.

Willing to relocate: Anywhere

Work Experience

Junior Software Developer

Texila Educare Healthcare Technologies Pvt. Ltd.-Chalaky, Thrissur, Kerala

January 2022 to Present

- Developed and maintained the SAAP application, a low-code platform similar to Zoho Creator, enabling teams to build and automate business processes with reduced development effort.
- Built and managed the Centralized Database (CDB) module in core PHP, functioning as an API manager for the Campus Management System and LMS, improving data integration across departments.
- Implemented biometric device synchronization within the CDB system, integrating attendance hardware with the backend to automate data capture, perform attendance calculations, and generate accurate reports.
- Designed and implemented RESTful APIs consumed by multiple internal services, ensuring high availability and clean integration.
- Collaborated with clients, project managers, and QA teams to gather requirements, define technical specifications, and deliver features on schedule.
- Mentored junior developers on low-code platform usage and workflow automation best practices.
- Diagnosed and resolved application bugs and performance issues, reducing downtime and improving user experience.

Education

Training Program

DDU-GKY (Training Program)

January 2022 to December 2022
